

MESSAGEBOX

KEEP

IT SIMPLE!

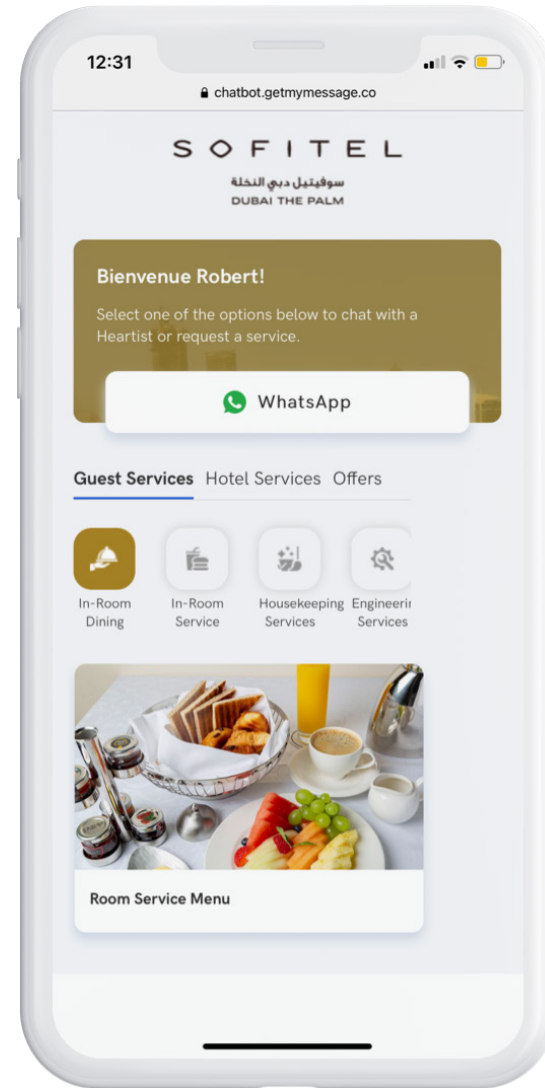

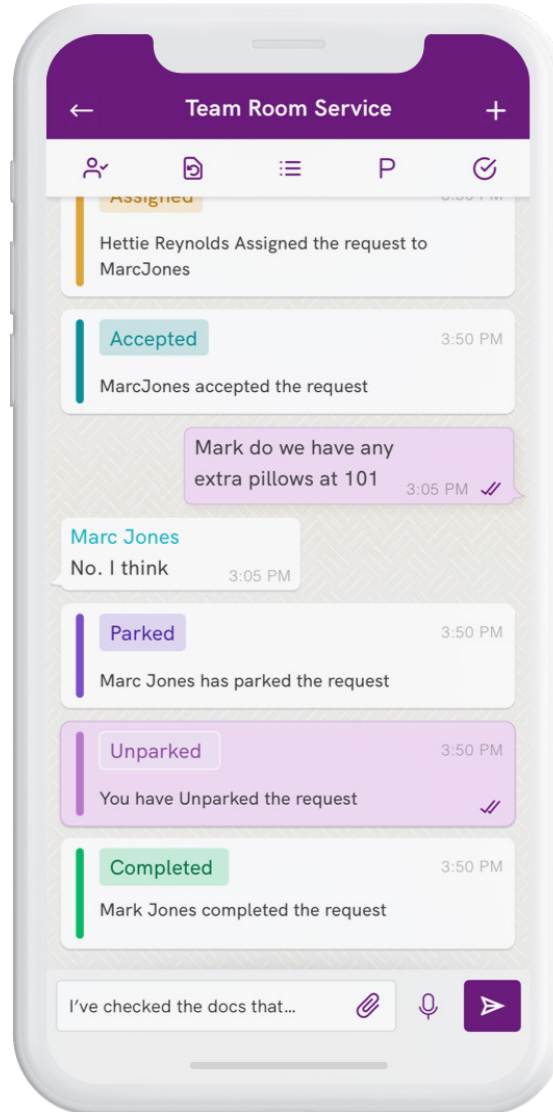

The most *simple* hotel  
Operations platform.

# GUEST REQUEST MANAGEMENT

## Simple. Easy.

MessageBox is the first completely chat based guest request management application for hotels.

Our goal is to make the life of your hotel staff easier, by providing a simple user interface that can be mastered in no time and to allow efficiencies to flow in to your operations processes as soon as possible.

## QR Code - Guest App

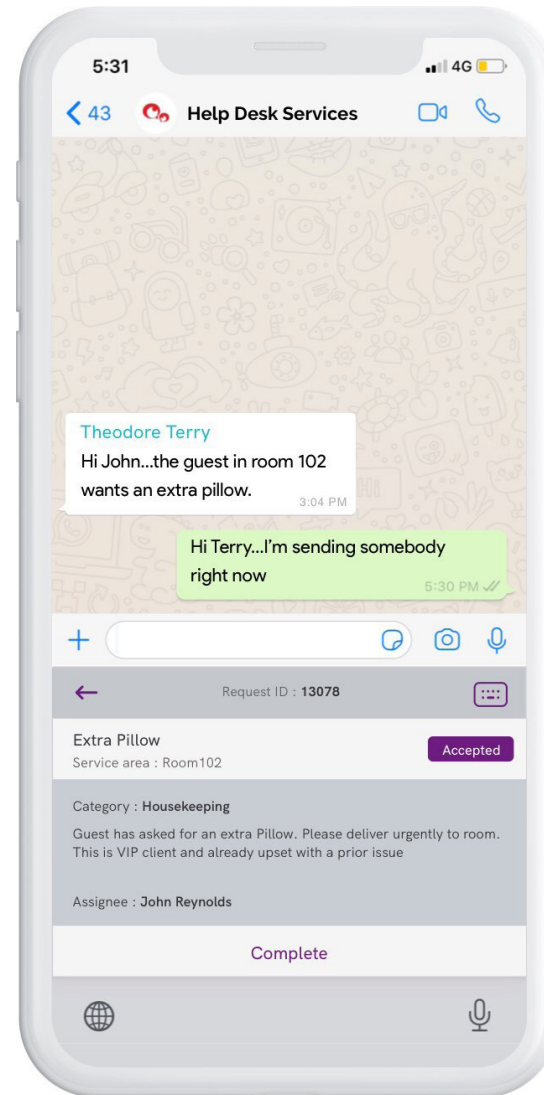

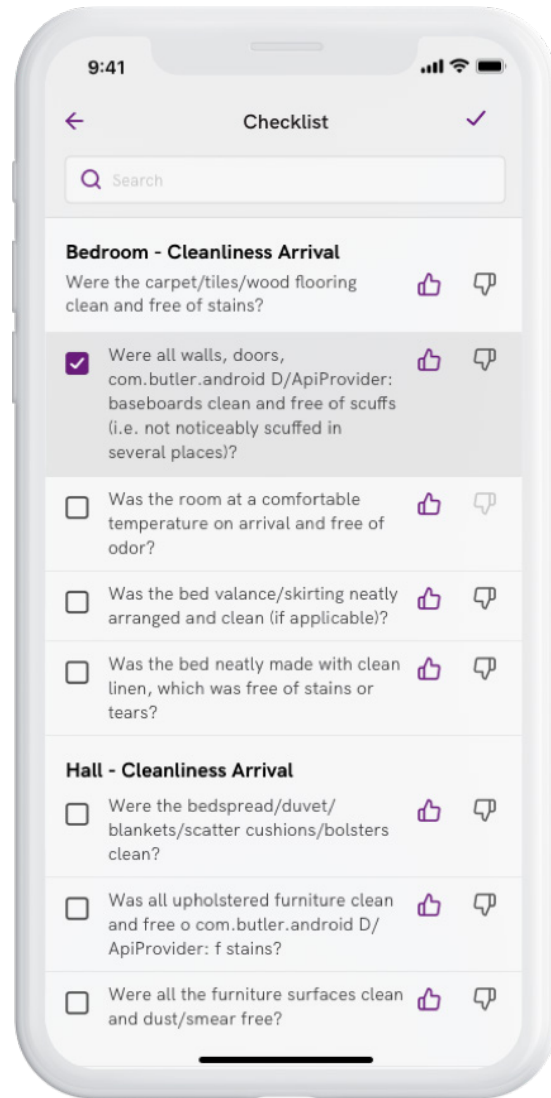

MessageBox comes with a beautifully designed URL based app for Guests. No Download. Just scan the QR code and start using. Moreover, we have integrated MessageBox with WhatsApp and all the major messaging applications, allowing the guest to communicate directly using their favorite messaging channel. .

## GUEST WEB APP & CHAT

# CHECKLISTS MODULE

## Organized!

Leverage our mobile checklists and checklist templates. Make temporary closures more organized, systematic and documented. Get rid of your clipboard and bring all essential checklists onto the mobile. Staff can now take care of extensive checklists by simply tapping on the screen while on the move in the property.

## Patented!

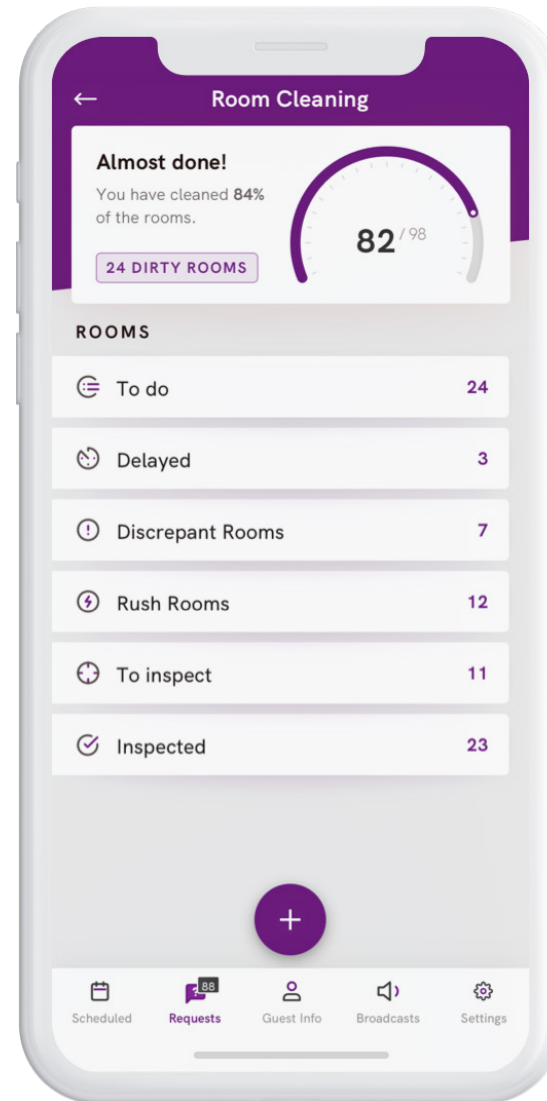

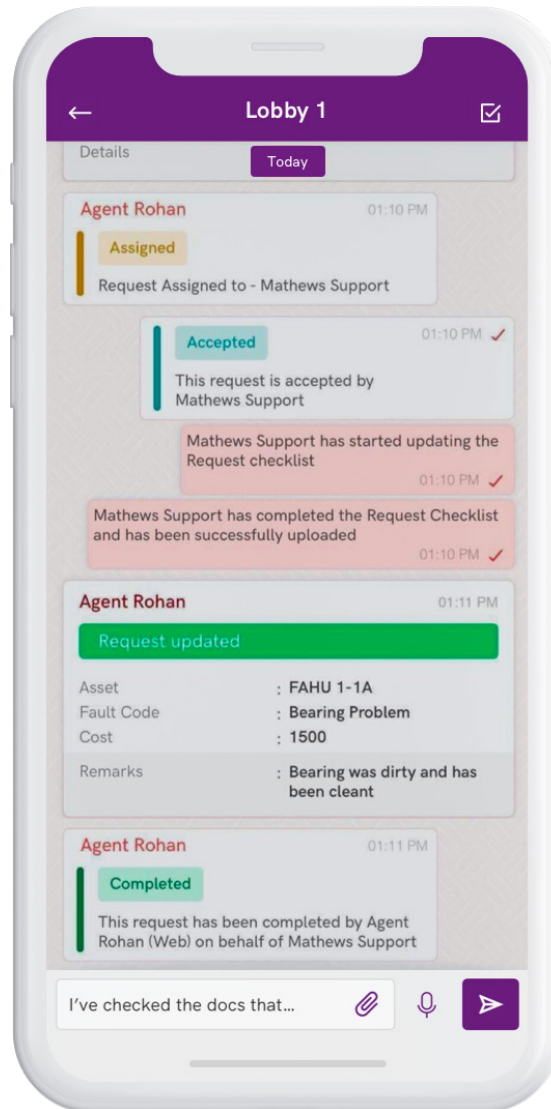

MessageBox is the only app in the market which integrates to any social messaging network. In addition to the MessageBox app, Hotel employees can manage/track any job using any popular messaging application - WhatsApp, LINE, WeChat, Messenger, Telegram or any other messaging application.

# USE IT WITH WHATSAPP...

# ENGINEERING MODULE

## Job done!

Engineering is a very complex function to manage. We wanted to uncomplicate the whole module so that any Engineering department, regardless of their technical savviness will be able to use the application and gain efficiencies from automating their processes.

# HOUSEKEEPING MODULE

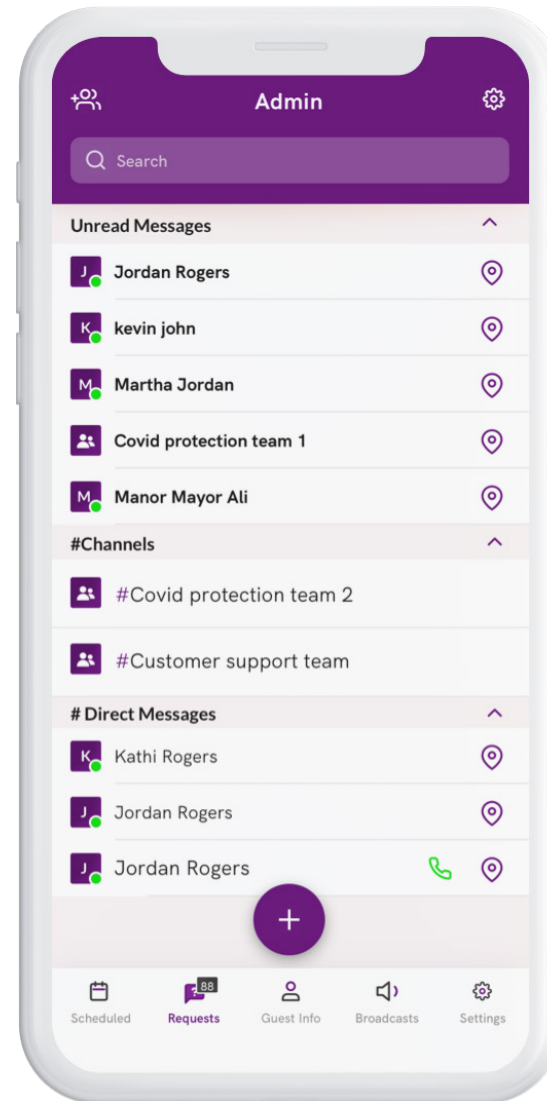

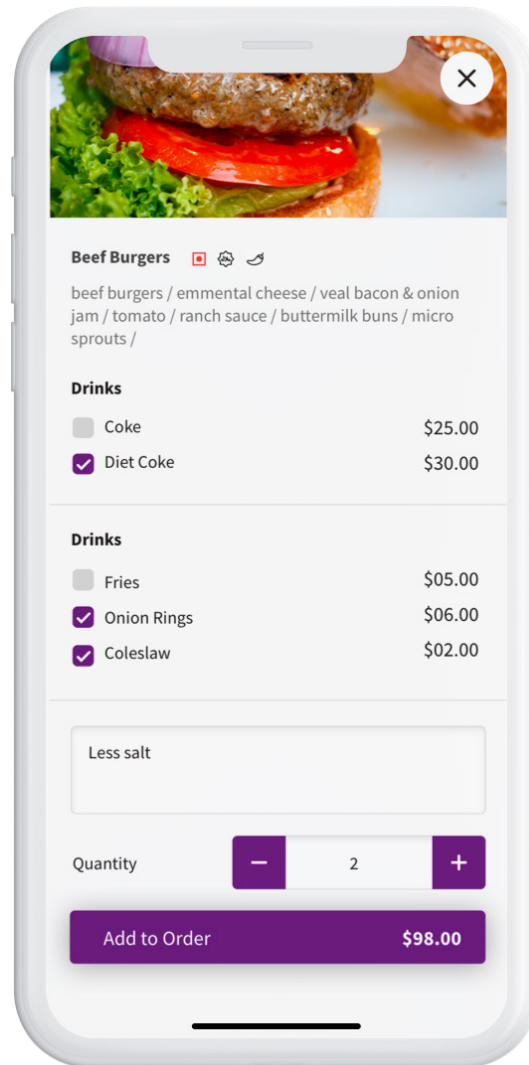

## Efficient.

A great user interface for attendants to ensure all the tasks can be done easily and seamlessly. Start room cleaning, pause, resume, complete, inspect and also communicate in a simple view.

# DIGITAL MENU/ ORDER DISPLAY

## End to End!

The first end to end Digital Menu solution - from an intuitive guest interface to complete order management - from the guest service center to Room service delivery. Chef's can now see all the orders and manage them through our beautiful Kitchen Display system. End to End. Simple.

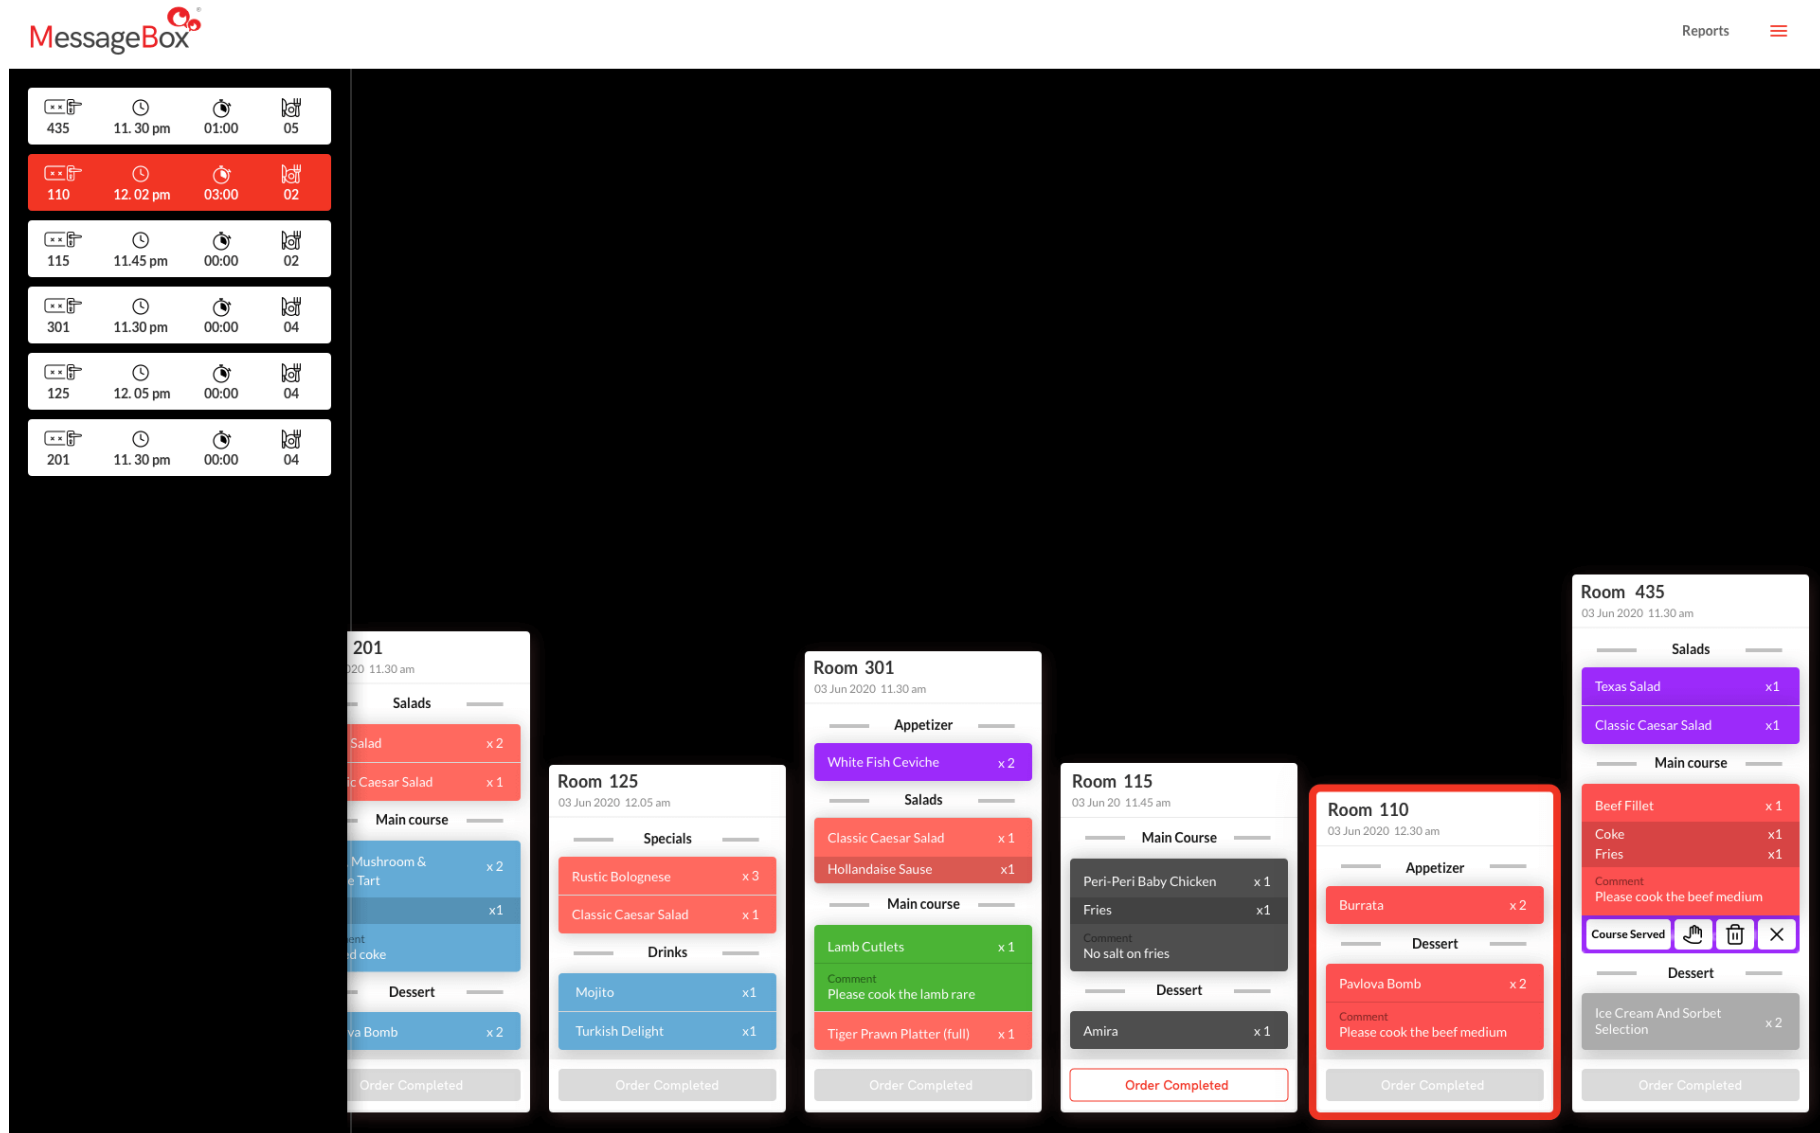

## Need More?

If your hotel is the type that wants to dig into more advanced features, then we also have quite a few of them. These features are only visible based on user request, so that other users don't get intimidated by unnecessary screens, labels and buttons.

AND  
MORE.....

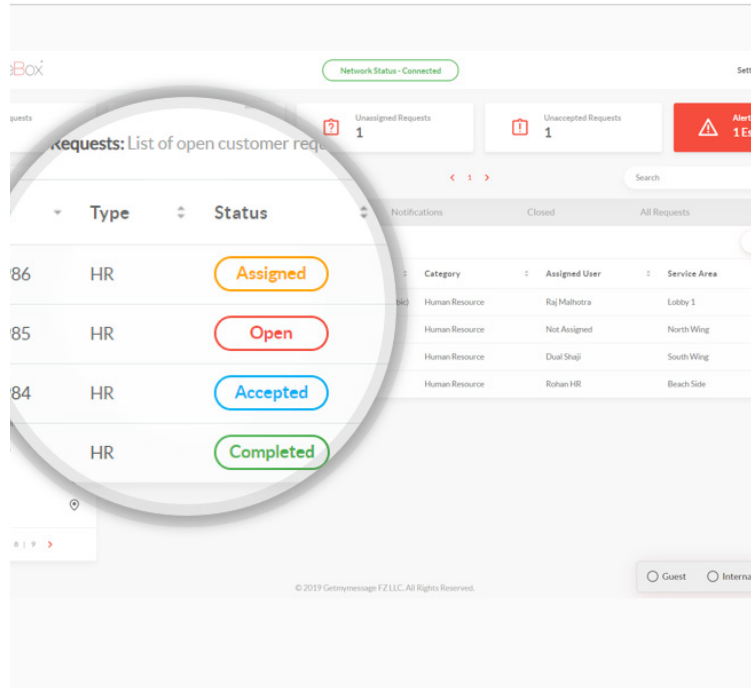

# Lifecycle Visual Display of Orders

## *End to End*

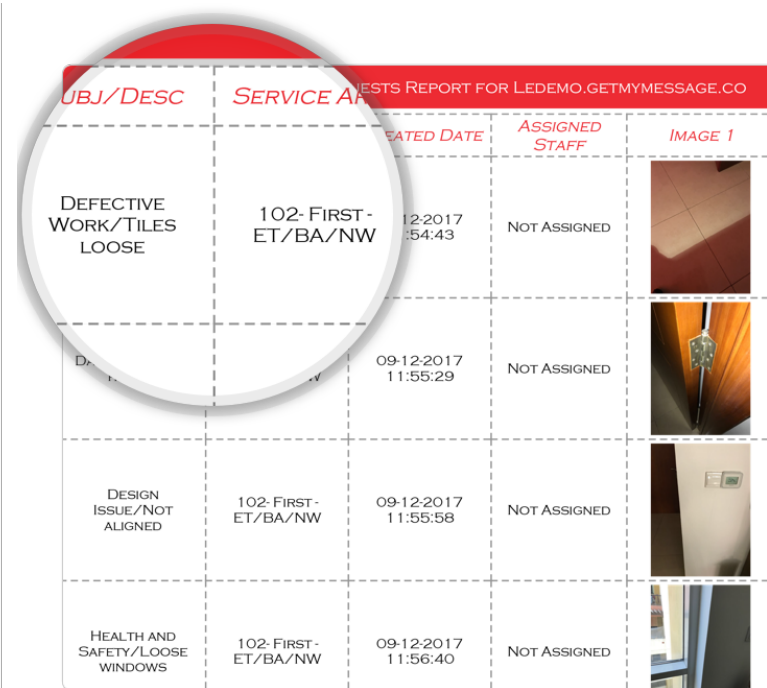

BEAUTIFUL DESKTOP DISPLAY  
FOR BETTER MANAGEMENT OF ORDERS  
*Great tool for chefs!*  
*Combines as a KDS too!*

No more paper requests....

AVAILABILITY	SERVICE TYPES	PLATFORM
<i>In Basic Version</i>	<i>Custom HR</i>	<i>Desktop/Mobile</i>
<ul style="list-style-type: none"> <li>· Employees can raise HR requests</li> <li>· Access to HR &amp; Employee only</li> <li>· HR specific Job Report</li> <li>· Create HR Templates for Job creation</li> </ul>

*We can't wait to have you onboard.*

We are *MessageBox* and we have built the first completely chat based task management app for hotels. *Our mantra is Simplicity.* We realize that the only thing that works in hospitality are apps which are simple to use and easy to deploy. No one wants apps with thousands of features. These are complex, difficult to understand and expensive to maintain. Keep it Simple. Come to *MessageBox*.
