State-of-the-Art Contactless Guest Experiences

Used by global hotel chains, available for you.

Successfully checked in!

Hi
Laura!

Introduce contactless check-in and check-outs while maintaining an enhanced level of communication with your guests. Adopted by global hotel chains, Incode's platform is designed to increase booking conversions with fast and effortless online reservation experiences that enhance safety through real-time ID and identity verification.

Data extraction from credit cards and IDs eliminates laborious manual data entry on small mobile devices. Create the guest experience of the future with Incode by digitizing identity, increasing hotel booking conversions, and enhancing safety and customer satisfaction.

Contactless check-in

Privacy-Enabled Online Bookings:

Increase booking conversions with fast and effortless online reservation experiences that enhance safety through real-time ID and identity verification.

Contactless Check-in Experiences:

Welcome back your guests with contactless check-in experiences made safely, securely, and privately to increase customer satisfaction while maintaining an enhanced level of communication with guests.

Seamless Transaction Verification:

Enhance transaction experiences by allowing your guests to validate payments with just their face while maintaining high levels of security and preventing fraud.

Automate Data Extraction:

Extract and auto-populate customer data from government-issued ID documents into registration forms.
