Instant access to web browser and most viewed apps - youtube, facebook, etc.

HEROApps

HeroApps Mobile Key Integration

ACCESS YOUR HOTEL ROOM DOOR WITH SMART PHONE MOBILE KEY

Guest can use a HeroApps smartphone app to open Hotel room. Keyless entry via smartphone is obviously more convenient than using a magnetic swipe card.
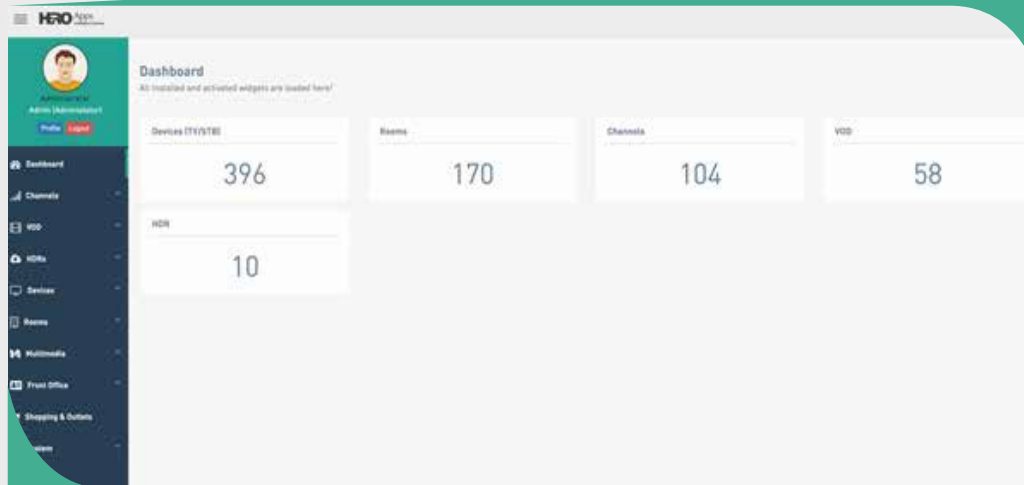

Keyless entry also means guest can skip the check-in desk and go straight to the room. Keyless hotel room entry works like this, Guest enroll Herapps Smart phone by installing an app. On the day of guest stay at the hotel, a "key" (some kind of encrypted code) is sent to guest phone via a push notification, along with a message telling which room number guest will be staying in. Then, you just hold your phone near your hotel room door, and voila - it unlocks.
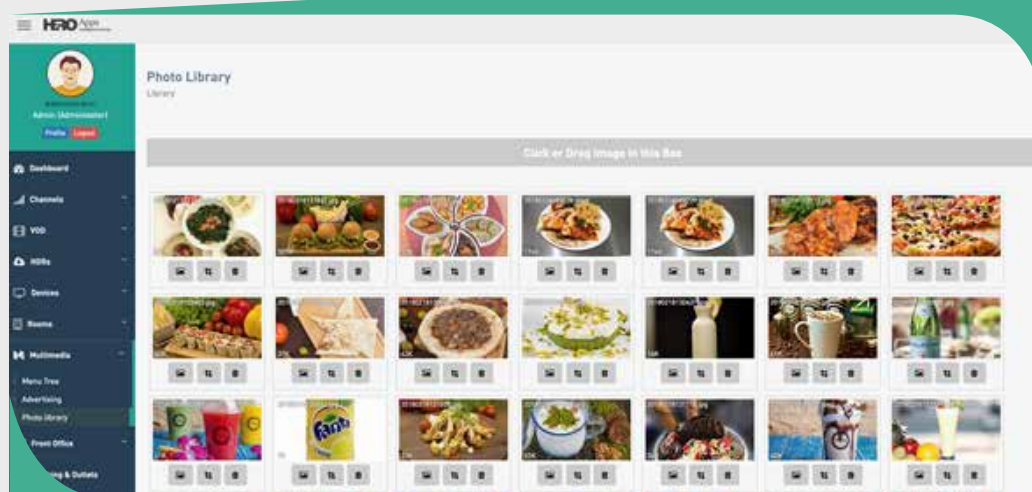

HERO Apps

HeroApps TV and Mobile Hospitality
### ONE CENTRALIZED PLATFORM FOR TV, STB, LAPTOP, TAB AND MOBILE.

HeroApps CMS is an all-encompassing suite of software tools for managing and monitoring all heroapps related content and services.
With CMS, hotel staff can easily manage content for in-room TVs, smartphones, tablets, laptops and digital signage monitors
