CORPORATE STRENGTHS

01 About GCSTIMES

Founded in 2011, GCSTIMES is a global professional and high-quality supply platform for sustainable development products and services. We're making efforts to providing unexpected solutions to the customers globally, and to making sustainability more easier.

GCSTIMES is headquartered in Zhuhai, China, with subsidiaries in the US, Australia, UAE, Thailand, and Hong Kong, China. Our products and services have reached to 139 countries and regions with over 100,000 hotels around the world.

02 Product & Service

By providing a series of low-carbon hotel products and solutions, GCSTIMES are helping more and more hotels to realize sustainable development. In response to the global trend of environmental protection and the government's call for low-carbon development, GCSTIMES is constantly evolving.

Eco-friendly smart cards

Eco-friendly smart cards

Hotel Supplies

Advocate, promoter and forerunner of eco-friendly smart cards

With the concept of environmental protection, GCS selects environment-friendly materials, develops wood, paper, plant leather and other biodegradable materials for key cards. And we has obtained the invention patents for almost all of them. The cards can be laser cutting, engraving, screen printing, digital printing and so on. We do our best to make each card perfect.

We take responsibility for the entire life cycle of our products, including the manufacturing materials, production personnel, packaging and transportation. We focus on the areas where we can make the biggest change to the earth: reducing our impact on climate change, protecting vital resources and using more environmentally friendly materials.

The first 0kg carbon environment-friendly smart card

Certificate of Registration

The use of eco-friendly smart cards with a certified carbon footprint will keep up with the high profile topics of the times and add to the major topics on climate change (GRI Standard 305 and 302) in the hotel group's ESG report.

Carbon Neutral self-declaration Reported reducing our carbon footprint through the use of environmentally friendly materials and by engaging in energy-saving and emissions-reducing practices at the manufacturing operations level. We have also achieved carbon neutrality in eco-friendly smart cards products by using carbon offsets for the remaining components that cannot be fully reduced.*GCSTIMES is committed to identify opportunities of reducing the greenhouse gas emissions of products with using product life cycle assessments.
