

GEETRON[®]

AUDIO SYSTEM

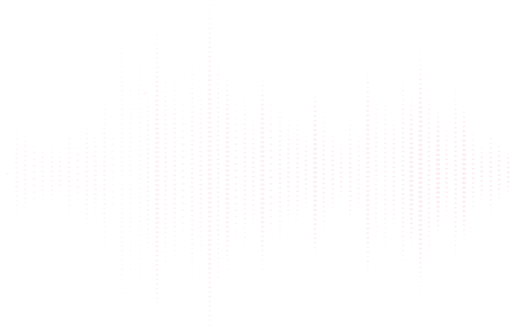

“Elevate your home audio
experience with seamless automation”

GEETRON AUDIO SYSTEM

Geetron audio systems are specifically designed for integration into home and hotel environments. They come in different sizes and power ratings to suit different needs and can be easily integrated into existing audio systems. They feature high power output, low distortion, zero delay. They also have various inputs and outputs, allowing them to connect to a variety of audio sources, providing a seamless sound experience throughout the home or hotel. With our high-quality sound and easy integration capabilities, Geetron audio systems are a great choice for enhancing the audio experience in hotels and homes.

GT-500W
Hi-Fi WiFi Stereo Audio Amplifier

Overview

GT-600PRO audio amplifier supports dual-band WiFi and Bluetooth wireless connection, support professional Karaoke function, microphone gain, reverberation, ECHO and other karaoke effects that can be adjusted, It is the best choice to create a home Karaoke audio system.

GL-600PRO also support Apple's AirPlay2 function and industry device interconnection standard DLNA, which can play music from iPhone, iPad, iPod touch through AirPlay2 function, and can also use a third-party PLAYER that complies with DLNA standards to play music on Android devices or PC or Multiple interfaces, multiple experiences.

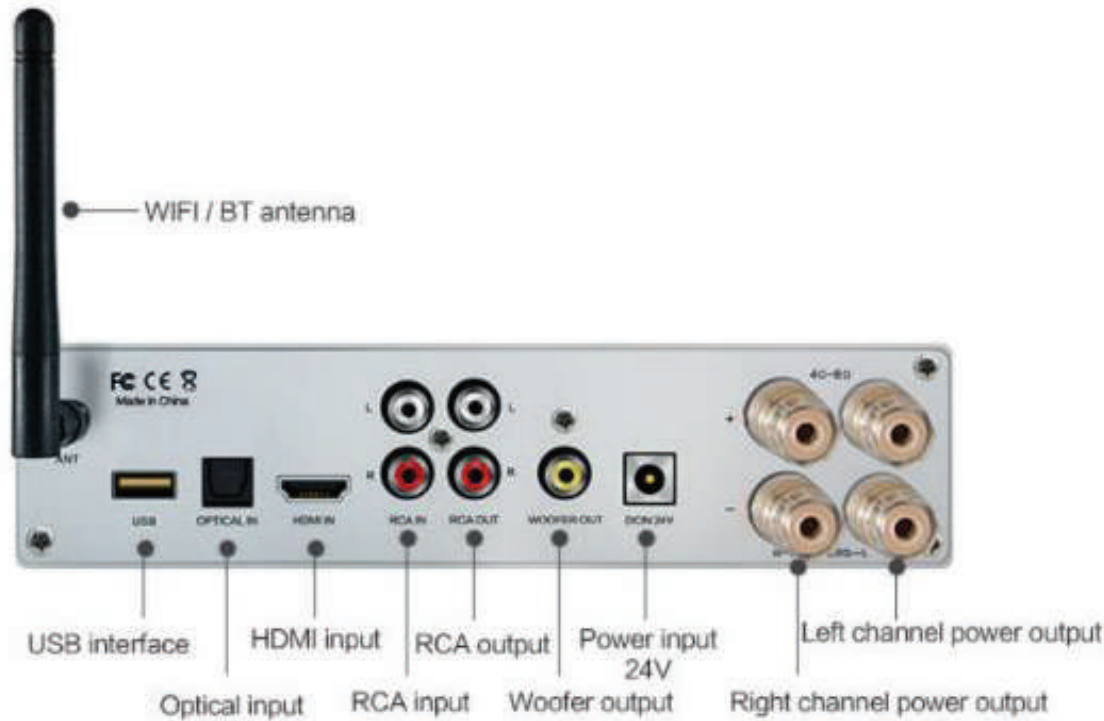

GT-600PRO

Technical parameters

Name	Technical Parameter
Product Name	WiFi stereo professional karaoke audio amplifier
Product Model	GT - 600PRO
Audio Input	WiFi2.4G&5G / Bluetooth 5.0 / RCA / HDMI ARC / Optical / USB Sound / USB playback
Audio Output	Speaker R+L/ RCA / Woofer
Operating Voltage	DC 24V-4A
Output Power	2X60W(4Ω)
Frequency Response	20Hz - 20kHz<± 2dB

THD+N Ratio	< 0.2%
Audio Format	MP3 / AAC / FLAC / ALAC / WMA / APE / WAV / OGG etc.
Music Source	Tuneln / iHeartRadio / Spotify / TIDAL / Napster / Qobuz / Amazon music / QPlay etc.
Music Streaming Protocol	Airplay2, DLNA, QPlay
Dimension	19.8cm×19.8cm×4.6cm
SNR	>90db

GT-600PRO

Wall Mound Speaker

GT-CSV1

Hifi Wall Mount Speaker

Overview

The GT-CSV1 HIFI wall-mounted speaker supports dual-band WiFi and Bluetooth wireless connections. The speakers of the wall-mounted speaker are selected from 6.5-inch full-frequency speakers and 1-inch high-fidelity tweeters. Professional tuners divide the sound and debug and equalize. It can achieve full frequency coverage of 60~20KHz, and the SPL is as high as 90db. The wall-mounted speaker uses the PCM5121 DAC chip of Texas Instruments and the TDA7498E power amplifier chip of ST. The combination of the two industry HIFI level IC has outstanding sound quality and high power. GT-CSV1 is divided into a master and a slave, a pair of two speakers. The slave is a passive speaker, which is connected by a speaker cable. The output power of the master and slave speaker is up to 120W, which can be adapted to various occasions.

GT-CSV1

The GT-CSV1 HIFI wall-mounted speaker also supports the AirPlay2 function launched by Apple and the industry device interconnection standard DLNA. It can wireless play music on devices such as iPhone, iPad or iPod touch through the AirPlay2 function, and can also use a third party PLAYER that complies with DLNA standards to play music on Android devices or PC. Dual-band WiFi transmission at full speed, multi-experience without delay of high-definition music.

Technical parameters

Name	Technical Parameter
Product Name	HIFI wall mounted speakers
Product Model	GT - CSV1
Audio Input	WiFi2.4G&5G / Bluetooth 5.0 / USB / AUX
IP Classification	IPX3
Work Voltage	AC110V~ 240V
Output Power	120W*2 (4Ω) (1 master + 1 slave)
Frequency Response	60Hz-20kHz
Harmonic Distortion	3% MAX
SNR	90db
Sensitivity	89±3db
Music Format	MP3 / AAC / FLAC / ALAC / WMA / APE / WAV / OGG etc.
Music Source	Tuneln/iHeartRadio/TIDAL/Napster/Qobuz etc.
Music Streaming Protocol	Airplay2, DLNA, QPlay
APP	Wiim Home
Download way	APP store/Google play
Dimension	217mm×190mm×293mm

GT-CS2W

Wireless WiFi Bluetooth Ceiling Speaker

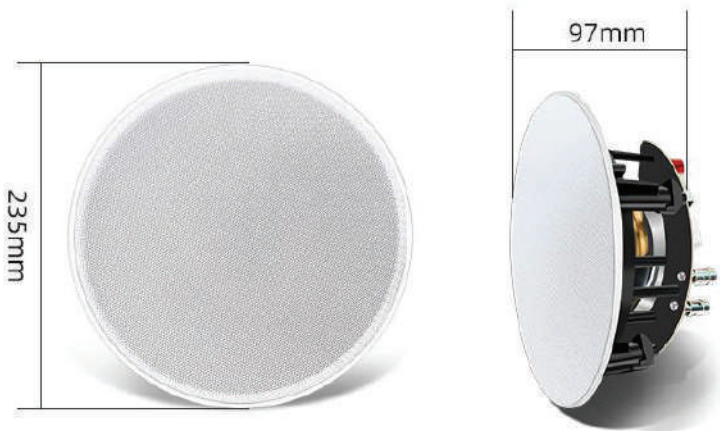

Overview

The GT-CS2W wireless WIFI Bluetooth Active Ceiling Speaker supports dual-band WiFi and Bluetooth wireless connection. The speaker is a 6.5-inch full-range speaker, integrated with a built-in tweeter, realizing full-frequency coverage of 20-20KHz, and SPL up to 90db. South Korea's Neofidelity NTP8835C is selected as power amplifier chips for the ceiling speakers. Professional tuner divides the frequency and adjusts the equalization of the sound. The level is clear and the sound quality is outstanding. GT-CS2W is divided into a master and a slave, a pair of two speakers, the slave one is passive speaker, through the audio line connection. The output power of the master and slave one is up to 60W, which makes it be applied to a variety of occasions. The GT-CS2W wireless WIFI Bluetooth ceiling speaker also supports Apple AirPlay2 function and the industry's device interconnection standard DLNA. It can wirelessly play music on devices such as iPhone, iPad or iPod touch through the AirPlay2. It can also use third-party player which is in compliance with DLNA standard to play music on Android devices or PCs. Dual-band WiFi full-speed transmission, and diversified experience hifi music played without delay can be realized through GT-CS2W

Technical parameters

Name	Technical Parameter
Product Name	Wireless WiFi Bluetooth Ceiling Speaker zero delay
Product Model	GT - CS2W
Audio Input	WiFi 2.4G&5G / Bluetooth 5.0 / USB
Work Voltage	DC 24V-4A
Output Power	60W×2(8Ω)(1Master+1Slave)
Frequency Response	20Hz-20kHz
Harmonic Distortion	0.1%
SNR	90db
Sensitivity	88±3db
Music Format	MP3 / AAC / FLAC / ALAC / WMA / APE / WAV / OGG etc.
Music Source	Tuneln / iHeartRadio / Spotify / TIDAL / Napster / Qobuz etc.
Music Streaming Protocol	Airplay2, DLNA, QPlay
Dimension	23.5cm×9.7cm
Net Weight	2.67kg (1Master+1Slave)

Features

Perfect Wireless Audio Solution: GT-CS2W enables you to enjoy high quality wireless streaming with WiFi, Direct Streaming, Airplay2, Spotify Connect, and Bluetooth 5.0. Feel and hear the incredible sound performance without messy wires.

Multiroom Audio System: Mix and match any combination of Geetorn Streamers and GT-CS2W wireless ceiling speaker to create a custom whole house audio system and play the same music throughout your home, send different music to each room at the same time, or create your own custom-defined multiroom zones... All are controlled via our Wiim Home App.

Powerful Wireless Amplifier Built in: You can easily switch between mono and stereo mode with GT-CS2W on your needs. Which power 60W*2 output at 24V on the stereo. If you only use a single speaker, you can switch to mono output to mix the L & R channel audio. *Accept 12V-24V power input.

Brilliant Sound Streamed Directly From Your Favorite Providers: Spotify, Amazon Music, Tidal, Qobuz, Deezer, Napster, Tuneln, Internet Radio, iHeart Radio, QQ Music, QQ FM. The WBC65 connects directly to your online streaming providers to play high quality audio, avoiding Bluetooth bottlenecks and compression.

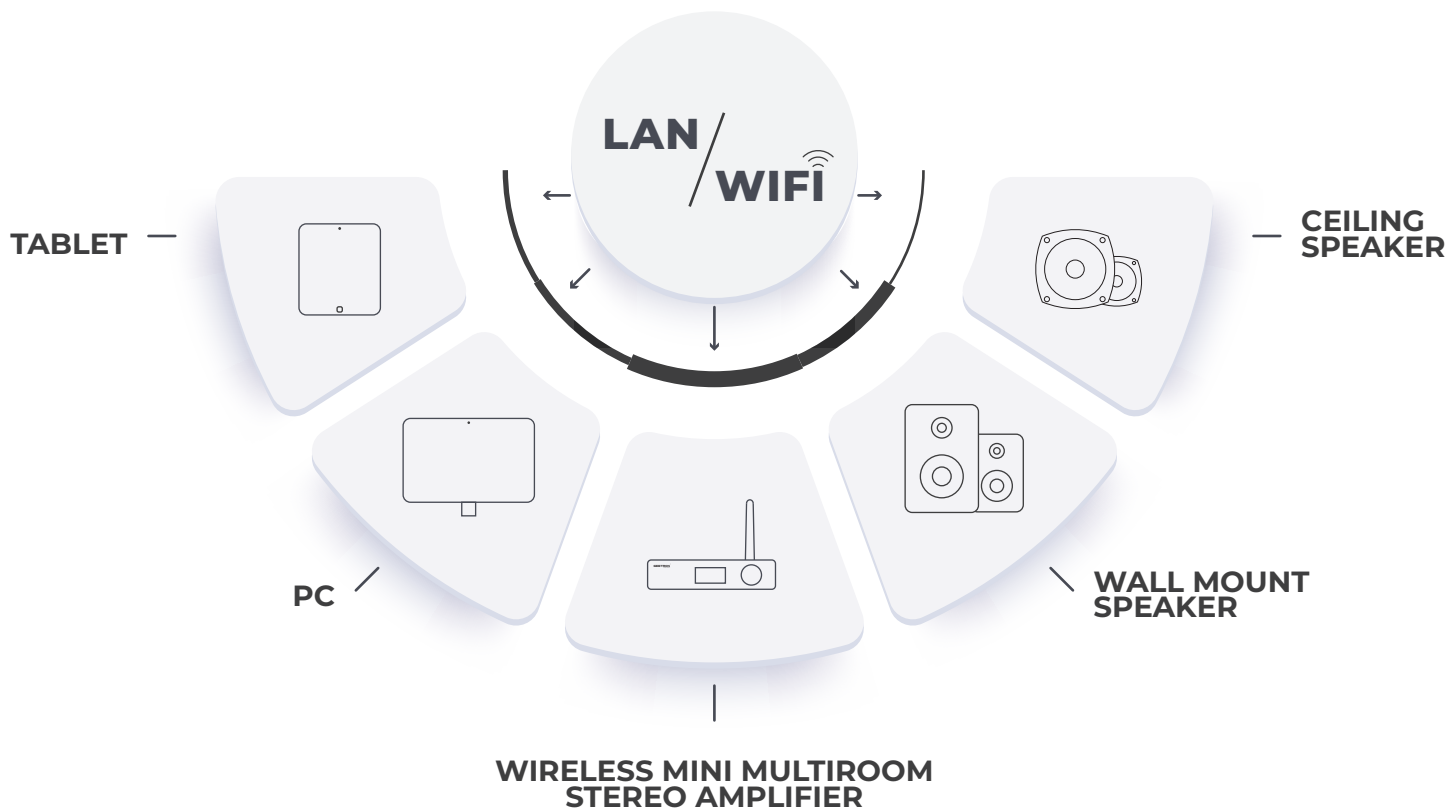

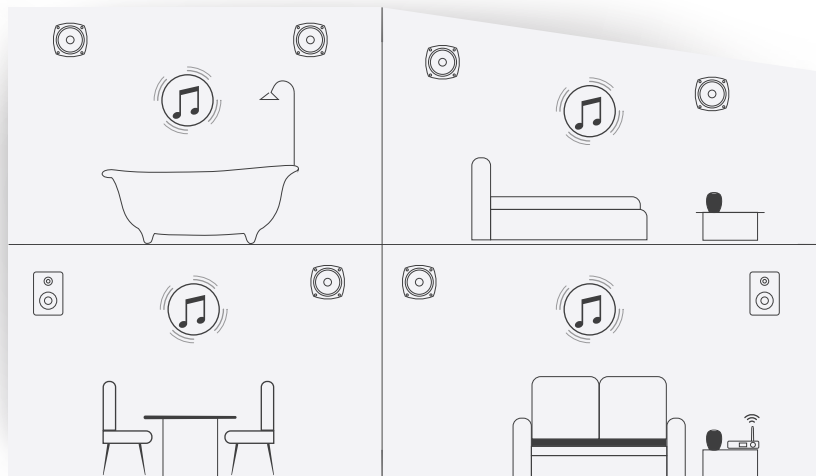

Easy Installation: Easy setup in minutes with a hole saw, a drill, and a screwdriver. After set the speaker into the ceiling, just push the taps then you are done.

High Performance Hardware: The 6.5 inches woofer utilizes a kevlar bass cone driver rubber overhang that has outstanding responsiveness and extraordinary dynamic carrying capacity, while the 1 inch tweeter adopts an aluminum dome driver EOS waveguide design which has broader sound range and higher penetration, with both offering resistance to indirect weather for years of high clarity enjoyment.

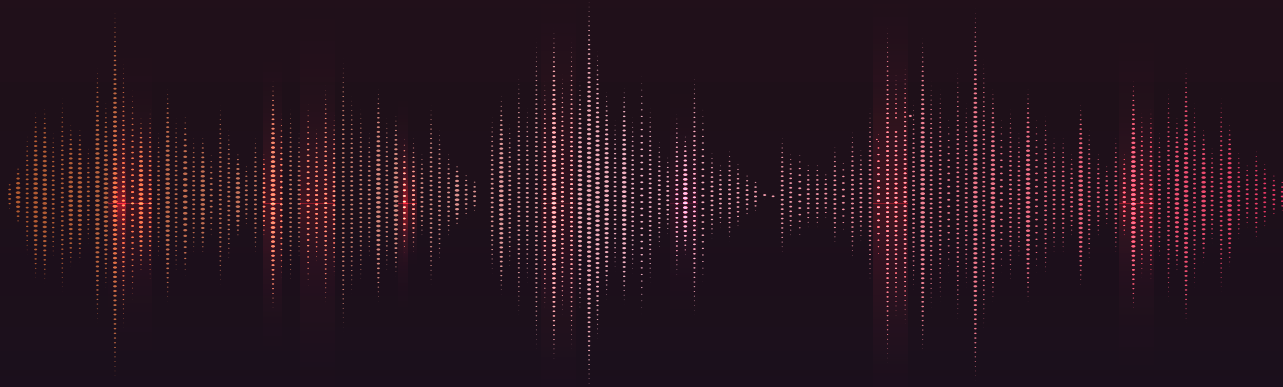

Powerful Wiim Home App: Choose your music source and control playback, set EQ, control multiroom/independent playback, manage playlists, control alarm clock, WiFi settings, OTA update firmware, and more... All the useful features you need in our free Wiim Home App for iOS & Android.

Web & PC Control: Control your devices via browser from any PC, tablet, or other devices, no app required. Or stream music using any software that supports Airplay, Spotify Connect, Tidal connect, UPNP, or DLNA protocols, including iTunes, Spotify, Tidal, Musicbee, and more.
