On Nov 21, Zhuhai Global Card Systems successfully attained the Guinness World Record for the "largest display of key cards" at its headquarters in Sanxi Science and Technology Innovation Town, located in Zhuhai's Xiangzhou district.

These carefully selected key cards come from various countries and regions around the world, each telling a unique cultural story.

Entering the exhibition hall is like entering a snail's shell. The curved walls contrast sharply with the bold lines of the cards on the wall. The soft lighting on the walls creates a sense of layers, adding depth to the exhibition.

Most of the 4,173 key cards are made from sustainable materials such as eco-friendly wood and leather, integrating unique artistic designs and environmentally friendly technologies.

From Jan 1, 2024, people can make appointments to see the exhibition for free.
