

The graphic features a large orange arch on the left containing the Dharma logo and the text "AI-Powered Operations Platform" and "We Make Your Guests Happier". To the right, three rounded rectangles show performance metrics: "Time Spent on Guest Messages" down 50%, "Call Volume" down 40%, and "AI Sales Conversion Rate" up 10%. A smartphone mockup displays a chat conversation with a guest about a TV issue, with an AI Assistant responding and creating a ticket. At the bottom right, a flowchart titled "Dharma's Operation Platform Key Features" shows the integration of Issues Management, Work Orders, Housekeeping Module, AI Assistant, and Central Inbox. On the bottom left, logos of partners like Deshaun and Weichert are shown under the heading "Trusted by", and text indicates "Supports 20+ PMS Integrations".

Dharma's Operations Platform: The Future of Hospitality Management

Dharma's Operations Platform (OPS) is revolutionizing hotel operations by seamlessly integrating **artificial intelligence** to streamline daily workflows and automate key processes at scale.

Designed to enhance efficiency and elevate the guest experience, OPS **centralizes operations and operational data**, enabling **AI-driven insights** while empowering hotel teams to work smarter, not harder.

If your legacy PMS is holding you back, **there's no need for a full system overhaul**. Dharma OPS seamlessly integrates with your existing setup, delivering the **agility, intelligence, and**

automation that modern hospitality demands—giving your team the **power and efficiency** to stay ahead in 2025 and beyond.

Key Features

AI Powered Issue & Task System – Streamline maintenance and guest service requests for faster issue resolution.

AI Housekeeping Management – Automate task assignments and cleaning schedules.

AI-Powered Chatbot – Deliver 24/7 automated guest support.

Central Inbox – Automate guest messages via email, WhatsApp, SMS, and more.

Ai Assistant
