

Sound Stylist Brings AI-Driven Music Curation to the Middle East at Dubai Hotel Show

Dubai, UAE – [Date] — Sound Stylist, a leading innovator in AI-powered music curation for hospitality, is proud to announce its participation in the upcoming Dubai Hotel Show. The company will showcase its groundbreaking audio platform, designed to help hotels and lifestyle brands craft immersive sound experiences tailored to their unique identity and ambiance.

Sound Stylist leverages advanced artificial intelligence and human expertise to analyze each venue's visual style, location, clientele, and brand ethos—automatically generating bespoke playlists and music schedules that evolve throughout the day. Whether it's setting the mood in a beach resort at sunrise, energizing a rooftop bar at sunset, or creating a refined vibe in a fine dining space, Sound Stylist ensures every moment is musically aligned with the guest experience.

"Sound is often the most overlooked design element in hospitality," says Sloane Angell, Co-Founder of Sound Stylist. "Our mission is to help hotels turn passive listening into a powerful branding tool—one that enhances emotional connection, elevates perception, and drives retention."

Currently serving clients across North America and expanding globally, Sound Stylist offers seamless integrations, curated human oversight, and hardware solutions like branded Raspberry Pi devices for plug-and-play use.

Visit Sound Stylist at SS3 F79 during the Dubai Hotel Show to explore how audio can become your brand's most memorable signature.
