ABOUT GCSTIMES

GCS TIMES, established in 2011, is a global platform that provides sustainable development products and services in professionalism and high-quality. With operational centres in China, United States, UAE, France, and Australia, along with 20 subsidiaries and offices worldwide, our business network has expanded to 141 countries and regions, serving over 100,000 hotels, including many internationally renowned hotel chains and properties.

Focusing on sustainable materials and innovative technologies, GCS Times has developed a range of products and solutions that have contributed to operational efficiency as well as the sustainable goal of low-carbon for our customers. We are committed to "providing fantastic solutions to realize sustainability for customers globally".

In the future, GCS Times will continue to drive industry innovation and expand its global influence. We welcome partnerships with more brands that pursue environmental protection and innovation, to jointly build a sustainable ecosystem in hospitality industry, achieving a win-win outcome in the long-term growth and environmental goals.

Bamboo · Corn Starch

ECO-FRIENDLY PRODUCTS Amenity Kits

In response to global trends of sustainability and the government's call for low-carbon development, GCS Times is continually breaking through technologies and making innovative products. By offering eco-friendly amenities as well as other related products, we contribute to our customer's goals of low-carbon, sustainable development in hospitality industry .

Bringing Your Travel Life Closer to Nature

Our sustainable products have been tested and certified by domestic and international institutions, ensuring 0 formaldehyde and 0 harmful components.

Bamboo

Bamboo is a renewable resource that is biodegradable and returns to nature at the end of its life cycle. It also has a capability of strong carbon sequestration, effectively absorbing carbon dioxide and mitigating climate change. The waste during its production and processing can be fully utilized, leading to environmental pressure and waste minimization. Bamboo's characteristics include durability, wear-resistance, softness and smoothness, meeting the current requirements for being green, sustainable and low-carbon.

Naturally degrade in a short period of time after disposal

Degradation to Carbon Dioxide and Water

Unharmful and not a burden to the earth's environment.

Renewable Resources

Degradation back into natural raw materials.

Corn Starch

Cornstarch-based material is a type of biodegradable plastic, typically made of cornstarch as its raw material. This material breaks down more easily in the natural environment, producing fewer greenhouse gas emissions during the production, thereby reducing their environmental impact.

Not a burden to the Earth after disposal

White Paper Laminated Bags

Eco-friendly white paper bag

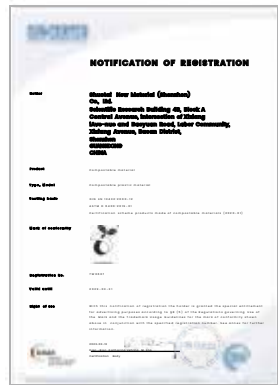

100% Recyclable Packaging, 0 white Pollution

Our packaging is cleverly designed to be more eco-friendly, both during the manufacturing and recycling phases. In response to the global plastic ban, recyclable eco-friendly paper and degradable materials are used to replace disposable plastic packaging such as PE bags and foam. Reduce the waste of resources and the harm of micro-plastics to the human body.

Passed the Authoritative Quality Inspection :

All packaging is Made of Green Materials

Low-carbon Logistics and Transportation

In terms of transportation, through measures such as optimizing the self-pickup route of raw materials, centralized transportation for collection and distribution, optimization of container loading as well as delivery routes, the proportion of air transportation to overseas countries has been reduced (air transportation is one of the high-emission transportation), thereby reducing carbon emissions in the transportation.

ACCOR

KAYA

Holiday Inn-IHG

They are using our sustainable amenity kits

More and more star-rated hotels are actively transitioning to eco-friendly products to reduce their carbon footprint, striving to provide a greener guest experience. Although small, the key card is the first product handed to hotel guests, conveying the hotel's business philosophy, carbon balance, and circular economy... all starting with each eco-friendly product.

CORPORATE STRENGTHS

We are Certified by FSC[®] (Forest Stewardship Council)

(FSC C148965)

Ensuring that our raw materials come from sustainably managed forests

Forest Stewardship Council[®]

Chain of custody certification from the FSC system applies to manufacturers, processors and traders of the forest products it certifies. It ensures the validity of all FSC-certified material and product claims along the entire production chain. By promoting forest-friendly wood products and paper products, FSC[®] helps ensure forests are healthy and thriving in the long term.
