Bamboo

Natural Wood Grain, High-end and Textured

We select natural wood elaborately; the wood texture of bamboo is perceptible and different. After use, it can be naturally degraded and has no environmental pollution.

Polished Pen Body, Delicate Hand Feeling

The wood pen body has been finely polished, and its quality has been improved to the next level. It is the ingenuity of the wooden pen.

Bullet Pen Tip, Smooth in Writing

The 1.0mm bullet nib can write every word smoothly without blurring. The ink has good water resistance, which would not bleed when exposed to liquid, and is not easy to fade under long-term exposure.

Kraft paper

Recyclable Kraft Paper, Eco-friendly, Non-toxic and Degradable

Rolled with recycled kraft paper, a variety of colors to choose from; the barrel of the pen body is delicate and firm, resistant to break, and skin-friendly and comfortable. The design of the pen body is moderate in thickness, and the grip is non-slip, making writing very light. When discarded, kraft paper can degrade naturally.

Bullet Pen Tip, Smooth in Writing

Wheat Straw & Kraft Paper, Fully Degradable

The wheat straw ballpoint pen is made of eco-friendly kraft paper pen body, and other accessories are made of eco-friendly and degradable wheat straw materials.

Wheat Straw Material Certified by Test Report

Eternal Pen

Sharpen-free,
Long-lasting Writing

The eternal pen is made of high-density graphite, which is much harder than traditional pencils, and the writing effect is similar to that of HB pencils. It can write about 15000 meters continuously. Wrong writing can also be erased with a normal eraser. Pencil body can be customized by different materials such as wood, paper, metal according to requirements.

Eternal Pen

**1 Eternal Pen \approx
150 Wooden Pencils**

An "Eternal pencil" is equivalent to 150 ordinary pencils, and making wooden pencils requires a large number of wood. The annual production of wooden pencils in the world is about 600,000 hectares of forest resources. Every wooden pencil is used, it will cause irreversible damage to the earth, so the use of the eternal pen virtually reduces the damage to forest resources, is durable, energy-saving and environmentally friendly.

Cost-effective Choice

The writing life of the Eternal pencil is 15,000 meters, while the writing life of an ordinary pencil is about 100 meters. In contrast, the eternal pencil has characteristics that the tip is not easy to break and the material of the pen body is more durable, so it is very cost-effective whether it is writing loss or daily loss.

Product	Portability	Writing Effect	Working Life	Materials	Handwriting	Pencil Body
Eternal Pencil	★★★★★	Lighter Color	15,000m	Eco-friendly Materials	Clear Long-lasting	Eco-friendly wood
Ordinary Pencil	★★★	Darker Color Easy to break	100m	Massive Forest Resource	Long-lasting	Wood

Ordinary Pencil

Eternal Pencil

The handwriting effect of Eternal Pen is similar to that of HB pencil, Fully meet the daily writing needs.

Raw Wood Pencil

Natural Wood,
Eco-friendly Choice

The raw wood pencil is made of FSC® certified natural wood raw materials. The natural feel of the pencil has long been comfortable. The wood is fine, easy to sharpen and does not produce debris; it is exquisite in design, high in quality and eco-friendly.

Wooden

Preferred Raw Woods

By using imported raw wood and finger splicing technology, the wood is used correctly to avoid wasting, and the comfortable and delicate wooden pen body is polished.

Exquisite Graphite to Provide Smooth Writing

By using advanced graphite technology, the tip of the pen is resistant to break, giving you a better writing experience. The texture of the pen core is fine and silky, and the color of the written text is dense and clear, which will not fade for a long time.
