- Easy installation
- Easy for operation, intelligent control support APP, Computer, USB

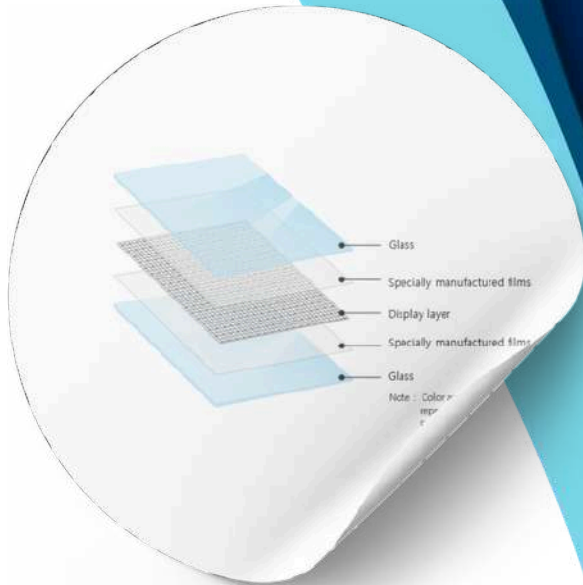

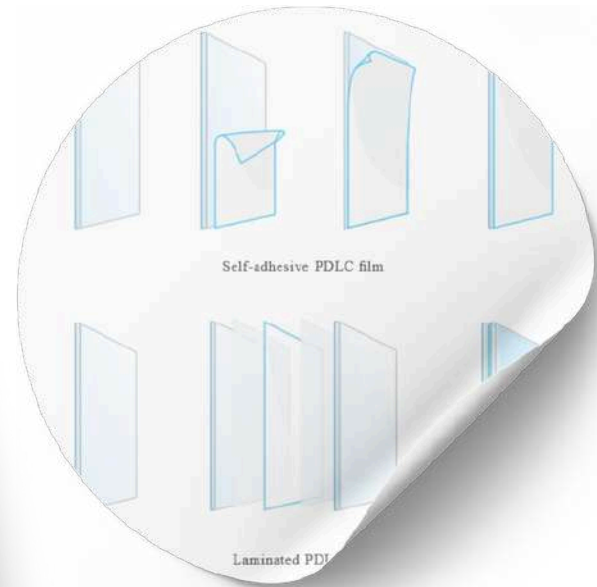

#### LED Film

- Ultra-thin
- High Transparency (50-90%)
- Easy to install
- Non-destructive repair

## PDLC FILM

## Two types of PDLC

- Self-adhesive film
- Laminated

Transform regular glass into dynamic privacy solutions, providing instant privacy or clear visibility on demand

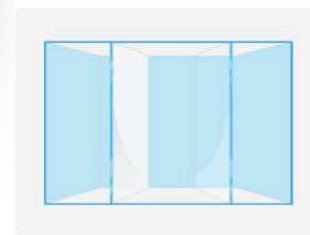

### Privacy protection

To protect your privacy and security, you can control it to be transparent or opaque at any time. Make your space more malleable, choose open or private at will.

### Security

Even if the glass is broken, the fragments can still be adsorbed on the PDLC film, which can avoid personal injury caused by broken glass.

### Space partition

With the use of PDLC film, glass partitions can easily differentiate between different spaces, making your three-dimensional space more malleable and versatile.

### Anti-noise

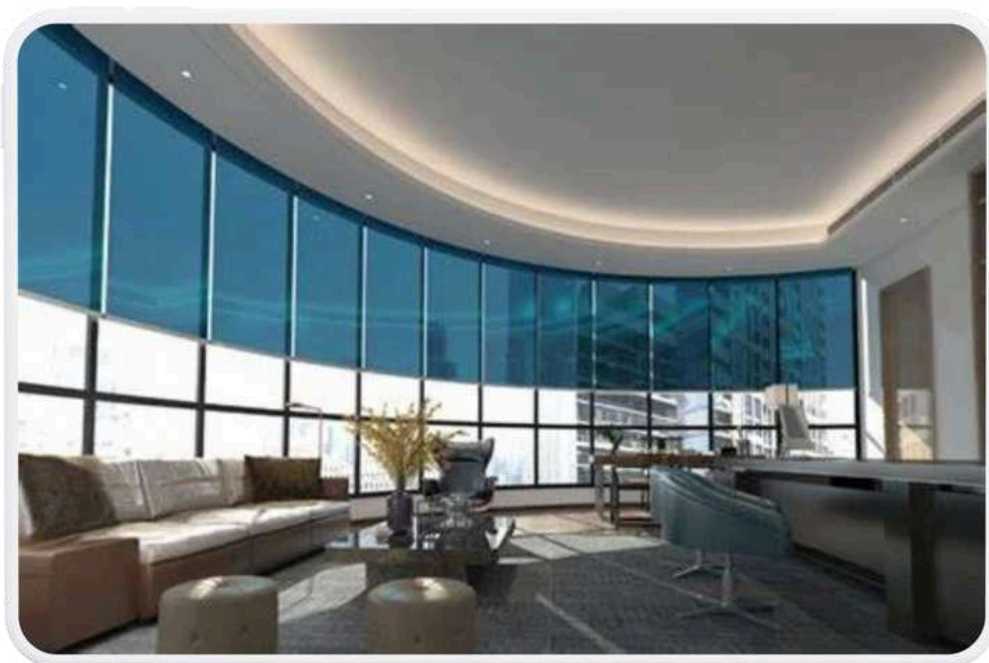

Compared with ordinary glass, the anti-noise ability of glass using Filmbase PDLC film is increased by 20%.

# Smart Curtain

Discover the future of curtains with Filmbase Smart Curtain. This cutting-edge fabric combines advanced technologies like

- High-efficiency light induction
- Magnetron sputtering
- Nano-film inner lamination to deliver elegance
- Heat insulation
- Shading
- UV protection
- Enhanced transparency.
- UV Block: 99.9%
- IR Block: 96%
- Visible Light Transmission: 5%

Transform your space with this revolutionary product

## UTD FILM

### Ultrathin Transparency Display

- **Transparent HD**

It offers full transparency and great resolution, allowing for optimal advertisement placement. High Definition, and 3D Future Technology has the potential to significantly increase the effectiveness of public relation

- **Ultra-Thin Profile**

The product is lightweight, UV-resistant, and anti-aging. The appearance is lovely and generous, representing the trend and avant-garde atmosphere

- **High Performance and Low cost**

Filmbase double-sided projection material offers exceptional performance at a low cost, unlike conventional 3D transparent and AR display technologies that are costly

- **Commercial Value**

Current 3D transparent and AR display technologies on the market come with high costs, but our double-sided projection film offers an ideal blend of superior performance and affordability
