OOKLA®

Ookla Enterprise™

Empowering enterprises with global internet,
Wi-Fi, fixed broadband, and mobile broadband

No matter the industry, business success is increasingly dependent on having reliable and highly-performing network connectivity. For companies looking for a trusted partner to deliver outstanding digital services, as well as design, optimize, and maintain first-class networks — Ookla Enterprise offers a suite of solutions, services, and certification programs that support today's expanding connectivity needs.

From evaluating the advantages of 5G, to complex industrial Wi-Fi design, to ensuring compliance with security standards and best practices — see how Ookla Enterprise can help you turn connectivity from a complication into your competitive advantage.

An all-in-one connectivity solution

Offering the best of both worlds for connectivity intelligence, Ookla Enterprise empowers data-driven decision making and helps you improve network performance to support today's most demanding use cases.

Unlike solutions that focus solely on mobile or fixed technology, Ookla Enterprise combines global expertise across internet, Wi-Fi, fixed broadband, and mobile broadband connectivity. Our tools help you make informed decisions about using Wi-Fi, cellular, or fixed broadband — helping you create efficiencies, save time and money, and ensure network performance acts as a business driver and catalyst for improved outcomes for both you and your customers.

⊘ SPEEDTEST®

Crowdsourced network performance, quality, and availability

Downdetector❶®

Service disruption monitoring and real-time outage alerts

ekahau®

Wi-Fi network performance, design, troubleshooting, and optimization

⊘ SPEEDTEST drive™

Controlled mobile network testing and benchmarking

Connectivity insights for every enterprise

Seamless connectivity isn't a luxury. It's the connective tissue of daily life, the foundation that powers enterprises big and small, and often the difference between a winning or losing customer experience. From monitoring of online services that you and your customers rely on to insights that help you create highly secure and compliant networks, Ookla Enterprise helps industries that depend on connectivity unlock competitive advantage.

Travel & Hospitality
Ensure seamless connectivity across Airport Wi-Fi, In-flight Wi-Fi, and Hotel Wi-Fi

Event Venues
Optimize connectivity for large events at stadiums, convention centers, and other venues

Financial Services
Detect and resolve outages in mobile banking applications and critical financial services

Logistics
Enable connected factories, warehouses, and distribution centers

Governments
Assess infrastructure needs, support smart city initiatives, and drive economic growth

Healthcare
Support telemedicine services and enhance connectivity across healthcare facilities

Gaming
Receive early alerts for outages impacting gamers and streaming service users

Education
Troubleshoot and optimize Wi-Fi and cellular connectivity across educational institutions and campuses

Partner with us

Success starts with connectivity. Partner with Ookla to deliver better products, experiences, and satisfaction to your customers.

- We work with you to create networks that are designed for success from the ground up or make data-backed decisions that will deliver enhanced connectivity and secured connected experiences.

- With Ookla, you can validate performance thresholds and ensure compliance with SLAs from the start, then maintain optimal performance with quarterly network health check-ups.

- Together, we can deliver networks that efficiently meet today's evolving connectivity demands and accommodate changing usage patterns.
