The STIL-FIT Ergometer

Innovative and unique – for your best performance

Workout in style – anytime and anywhere

Thanks to its elegant look, the outstanding design and its compact dimensions the ergometer fits perfectly in any living environment. The successful combination of form and function will make our ergometer the eye-catcher in your house, home gym or office.

Functional and as individual as you are

We used real street bikes as role model in order to transfer the advantages and possibilities on our ergometers. Perfect ergonomics with multiple adjustment options, a very comfortable seating position and a small Q-factor. Furthermore, we incorporated real biking components that can be exchanged according to your requirements and wishes. (Saddle, pedals, handgrips and the handle bar)

- Exclusive and timeless Design
- No external power necessary
- Very quiet with a good runout
- slender body

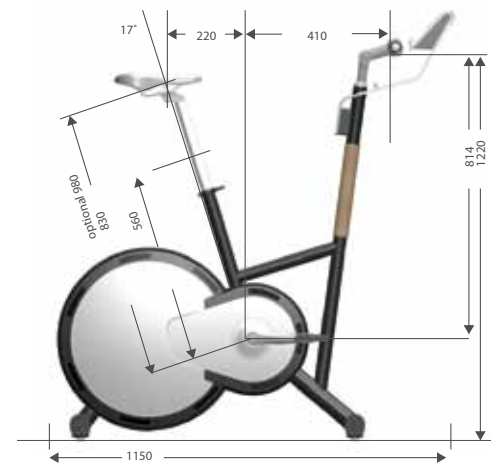

Made in Germany

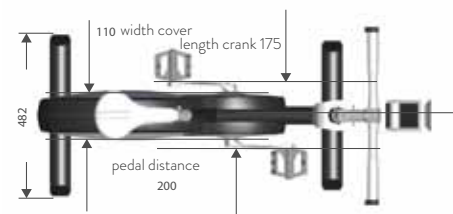

Development and production are located in Munich. To make sure the products meet our requirements the final assembly, quality control and the shipping department are located in Munich, too.

Cardio training strengthens body and mind

If you want to do an intense and effective workout you are just right using our Ergometers. Cardio training strengthens the cardiovascular system, burns fat effectively and supports muscle growths, thus boosting health and wellbeing - a highly effective whole-body training.

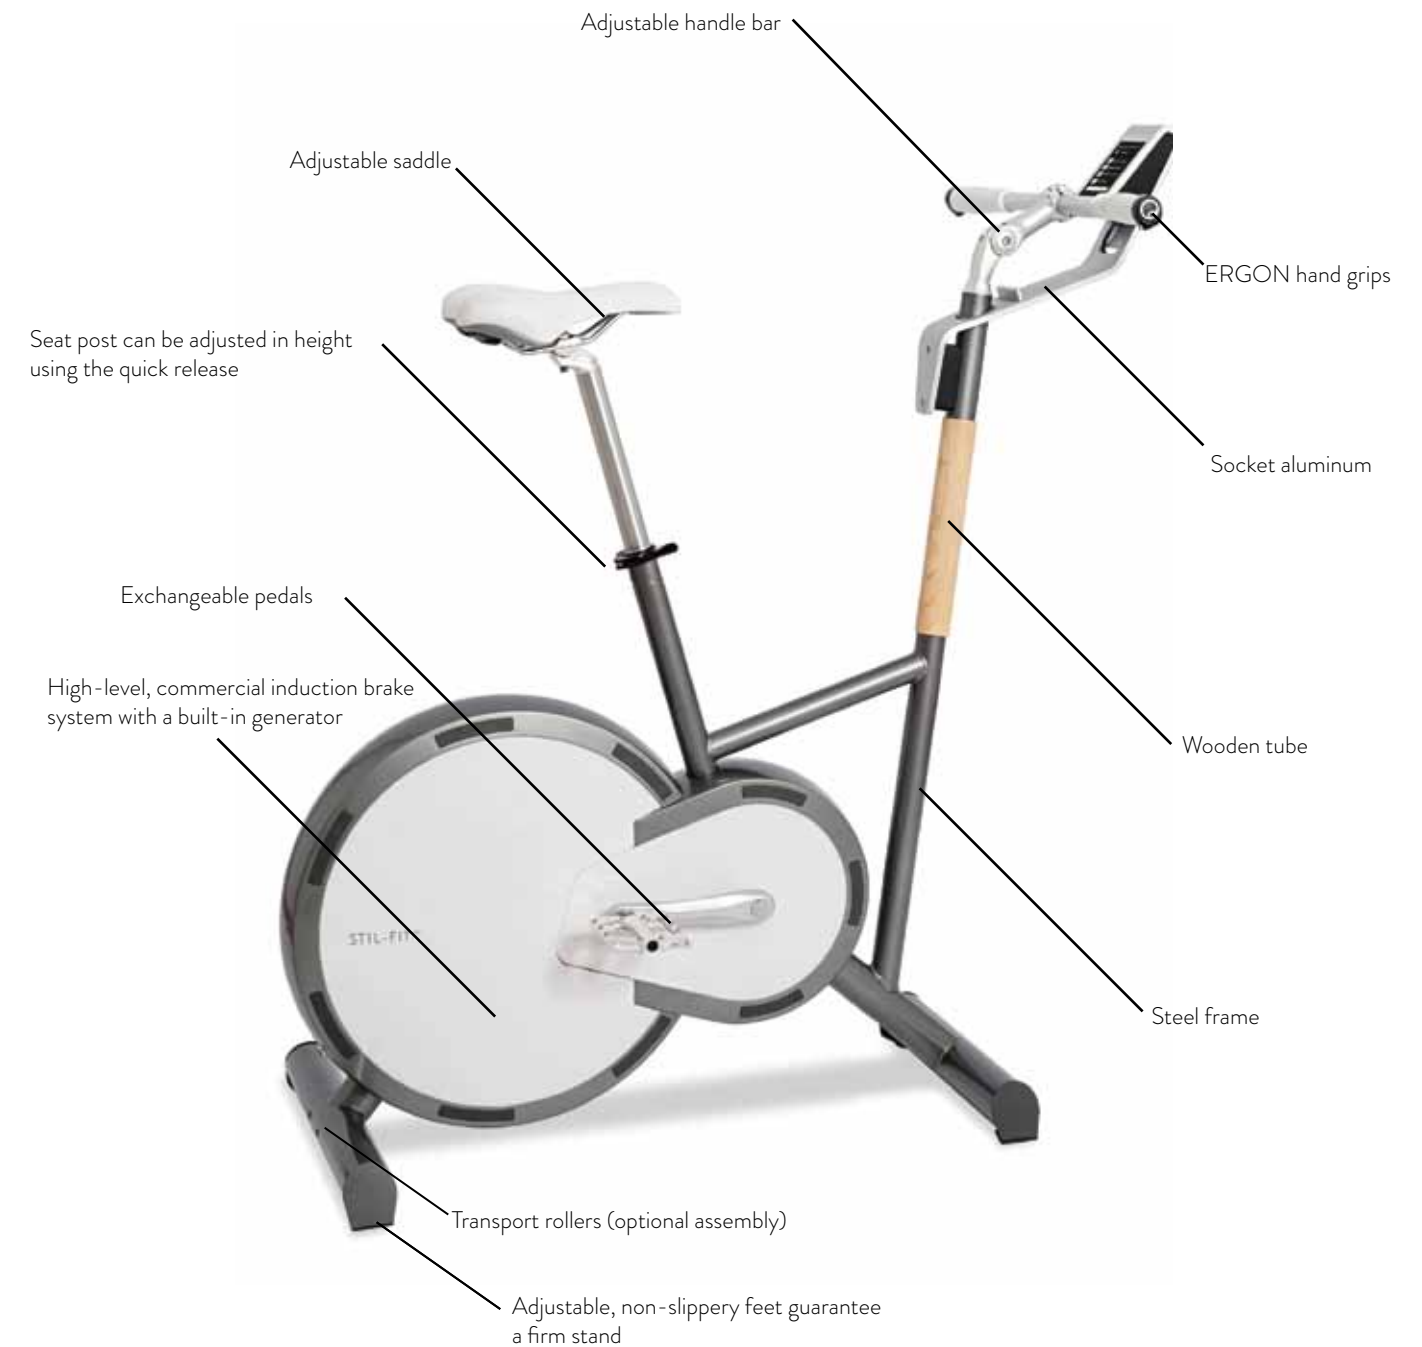

Ergonomics similar to a street bike

The Ergometers in detail

Thanks to years of experience our ergometers are thought out right down to the last detail. Only top-quality materials are being used and we ensure first-class manufacturing throughout all processes. The core component is the extremely powerful and wear-resistant induction brake that is generator powered and controlled by our own software

Ergometer SFE-009/2

Intuitive and efficient Cardio training

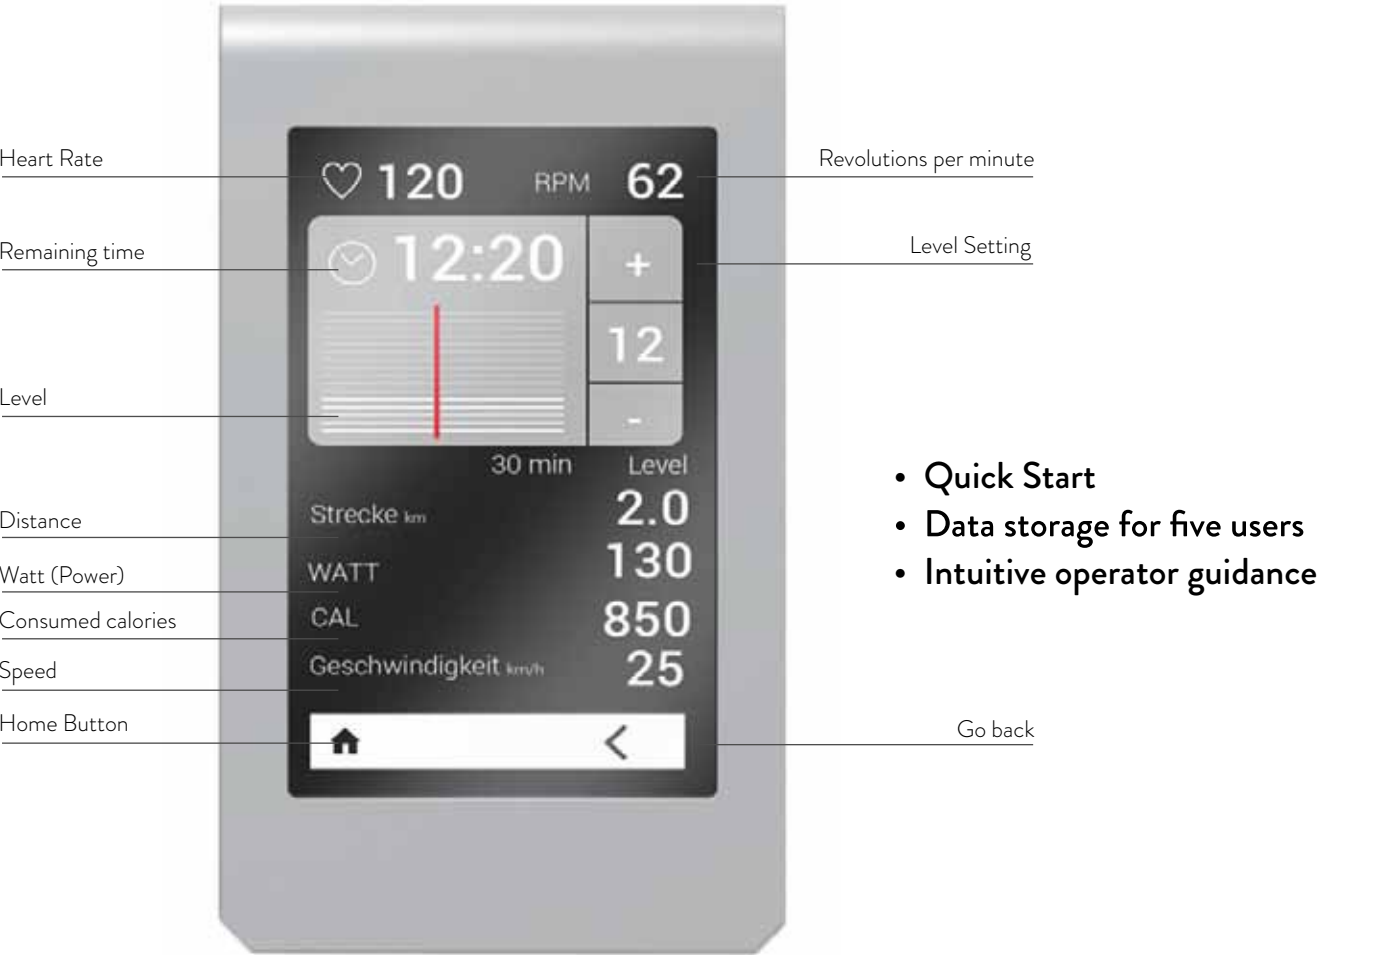

Unique and outstanding Design

The ergometer SFE-009/2 with the elegant on-board trainings computer distinguishes itself from conventional ergometers through its excellent design concept paired with highest quality materials and a perfect finish.

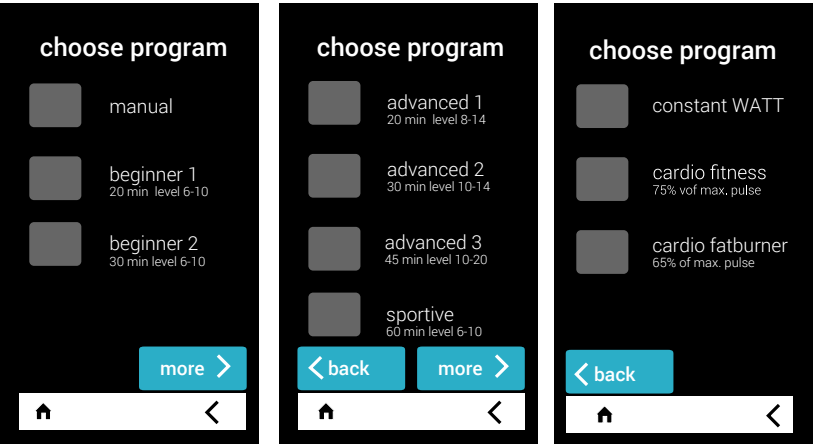

Powerful Training computer

We have equipped the SFE-009/2 with a 4,3"TFT color touchscreen monitor and a user interface that is self-explanatory and easy to use with a clearly arranged operator guidance system. The trainings computer provides you with a wide range of different programs and gives you the opportunity to store training-data for up to five users.

Ergometer SFE-012

Motivating and entertaining

Controlled via tablet-PC

The innovating model SFE-012 is completely controlled by a tablet-PC (e.g. iPad or Galaxy Tab) and will make your workout a lot more enjoyable and efficient. Benefit from the large and clear display, a great number of trainings programs, a sophisticated analysis tool and your personal entertainment program.

Connected training for maximum motivation

During your workout all features and functions of the tablet-PC can be used without restrictions. While you check your emails, schedule your day, read the news or watch a movie the App is running in the background storing all necessary training data.

Free app – always up-to-date

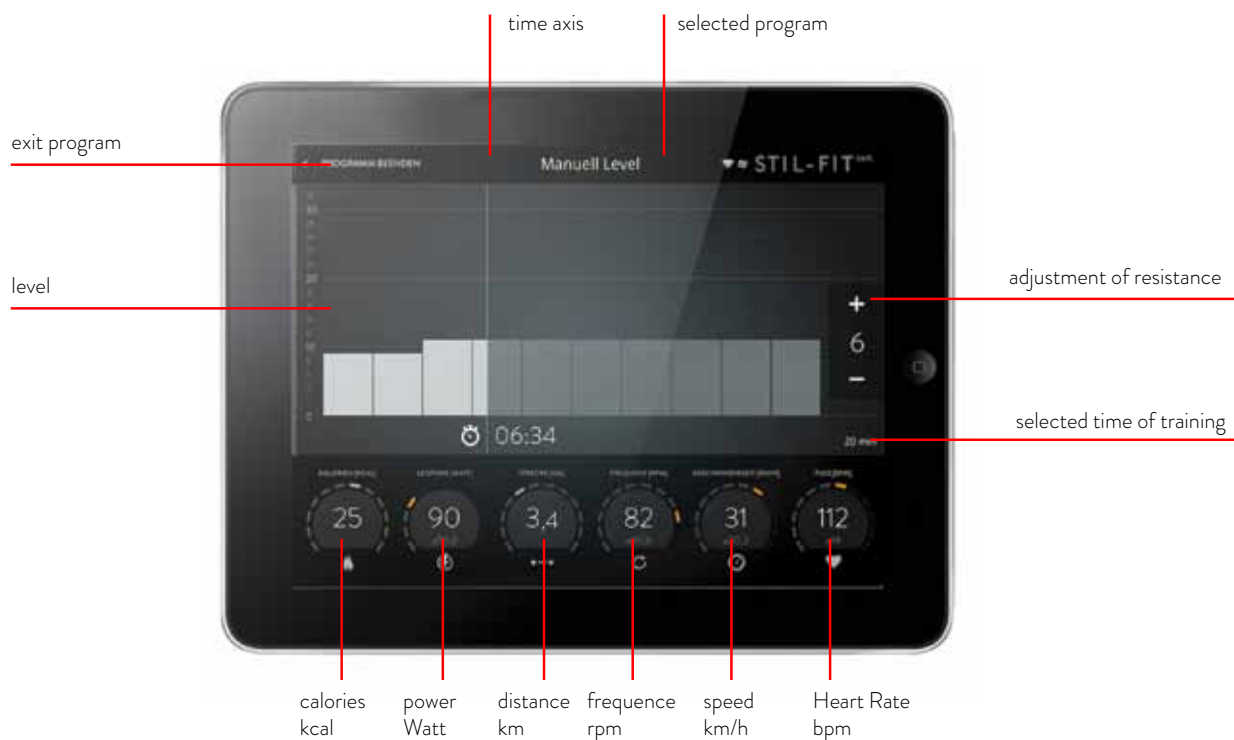

The STIL-FIT App is available for free download at the App store for iOS and Android. Our software connects the ergometer within a few steps to your home WLAN.

The STIL-FIT App

Training screen

During work out all figures are shown in a clear manner

Available for

- Tablet-controlled
- Clear display and easy operation
- Full entertainment while working out
- Analysis tool & Data storage
- Free app

Training programs and powerful analysis tool

The ergometer provides a great variety of training programs. The app includes our analysis tool that stores all data for a countless number of users. With this tool you can keep track of all your training data, your progress and compare your training sessions.

STIL-FIT Functional Trainer

Multifunctional training with exceptional Design

A high-end gym equipment for private and professional use

MADE IN GERMANY

Handles steplessly adjustable

Dimensions / Weight

Width: 126,5 cm
Height: 210 cm
Housing depth: 31 cm
Total depth: 40 cm
Weight stack: 85 kg
14 weights at 5 kg
5 weights at 2,5 kg
Starting weight: 2,5 kg
Total weight: ca. 150 kg

Technical details

Transmission: 2:1
Extension length in double pull: 2,2 m
Extension length in single pull: 3,2 m

Included Accessories

Handles made from wood, with ball bearings and leather strips.
User manual with workout booklet

Benefit from our sophisticated design

- Optimizes the available space thanks to the compact dimensions.
- The handles can be swiveled and independently positioned at any height.
- The distance between both handles is 90 cm – thus allowing for an additional variety of workouts.
- Markings at the sliding rails allow an easy height adjustment.
- Due to our special weight stack the minimum starting weight is 1,25 kg and the maximum weight 42,5kg per handle.

Additional Lat pulldown unit

Effective, versatile and perfect for a full-body workout

The multiple adjustment possibilities in combination with a wide range of available accessories offers an unlimited number of workouts. You can specifically and individually exercise every muscle, but also address whole muscle groups – designed to maximize your strength, increase your power and improve your coordination.

ESSENCE

PURE

STIL-FIT AB Trainer

AB Training in style

The proven and well-known AB Trainer gets a brand new and unique redesign by STIL-FIT. Thanks to its ergonomic and elegant shape and the use of wood it will add style to your apartment or gym. During your workout the head rests on a high value leather cushion, which supports your body and guarantees a smooth movement.

Constitutional and effective

Working out with an AB Trainer is especially effective as you can precisely target all abdominal muscle parts. Strengthening the body's core is essential for maintaining a good composure and an upright walk.

To prevent the AB Trainer from slipping during exercise it is equipped with a rubber insert at the bottom.

STIL-FIT Fascia Roller

Effective and long-lasting

According to the latest studies, the fascia training is essential for a holistic training. The fascia acts as an enveloping and stabilizing element of the entire musculature and can be stimulated and activated by targeted training.

The benefits

- Direct activation and regeneration of the muscles.
- Improves coordinative abilities
- Improves performance, mobility and flexibility of the muscles
- Prevents muscle pain and avoids typical injuries
- Stimulates the blood circulation
- Increases your overall performance and wellbeing

Our Design 'fascia roller' is made from Walnut wood, covered with artificial leather and reinforced by two aluminium rings. Great looks combined with exclusive materials.

STIL-FIT Backstretch

Relaxation for your back

After an intensive workout with our products the BACK Stretch is perfect to release tension and stretch your back and spine. It also makes a positive contribution to the reduction of a painful back and neck.

Just lay down, relax and breathe continuously and smoothly for about five minutes. You can use the BACK Stretch in two different positions.
