

The Galleri Micro-Farm is designed to transform the way we grow and enjoy food. By bringing cultivation closer to the table, it eliminates food miles and ensures access to fresh, ultra-nutritious produce year-round. Its elegant design and sustainable growing system make it a centerpiece for fostering connection, whether in homes, schools, or workplaces, while promoting healthier, more sustainable communities.

Benefits + Features

Maximized Capacity

Removable trays provide 280 grow spaces, perfect for extra greens or maximizing ROI by dedicating the entire farm to microgreens.

Flexible Support Plans

Choose between our standard and premium support plans to match your service level needs and budget.

Growth Optimized

The Galleri is designed to enhance your growth with effortless operation, reliable performance, and peace of mind

Elegant Design

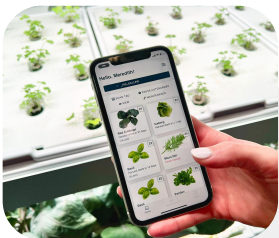

The Galleri showcases a tinted glass back and finish, blending elegance with modern design. Custom branding included for a personalized touch.

Connected + Controlled

Controls are accessible through a dedicated app, providing alerts, support, and dosing information via the farm's Ethernet connection.

Food-Safe Cultivation

No pesticides or herbicides are needed, as our enclosed and lockable garden ensures food safety. The trays are dishwasher safe and easy to clean.
