

Company Profile

AirOWater is the only sustainable drinking water company in Dubai that invests in glass bottles and crates on behalf of the hotel, charging only for the water consumed. Our model is simple and efficient:

We supply purified water in reusable glass bottles using plastic crates.

Once the water is consumed, we collect the empty bottles, re-sterilize them, refill them, and deliver them back, ensuring a seamless closed-loop system.

Why Choose Our Solution Over Single-Use Glass Bottles?

1. **Centralized Bottling:** Water is purified, bottled, and delivered from our state-of-the-art facility in Dubai.
2. **Cost Efficiency:** Save up to 60% compared to single-use glass bottles.
3. **Sustainability:** Zero waste—bottles are sanitized, refilled, and reused, reducing environmental impact.
4. **Private Labelling:** Custom-branded bottles with your hotel's logo for a premium guest experience.
