ARGGER Chainmail Curtain

Chainmail curtain is a metal mesh fabric made of countless interlocking circular rings. It was often used in medieval Europe as a material for soldiers' armor, while in modern times, it often serves as a decorative wire mesh. It can be used as curtains, dividers, ceiling decorations, fireplace screens, etc. The flexible structure of chainmail mesh can present complex, changeable shapes and various decorative effects to meet the different stylistic needs of designers.

Specifications

Various specification options meet your personalized demands.

Material: iron, 316/304 stainless steel, copper, brass, aluminum

Wire diameter (a): 0.5 mm, 0.8 mm, 1 mm, 1.2 mm, 1.5 mm, 2 mm, 4 mm

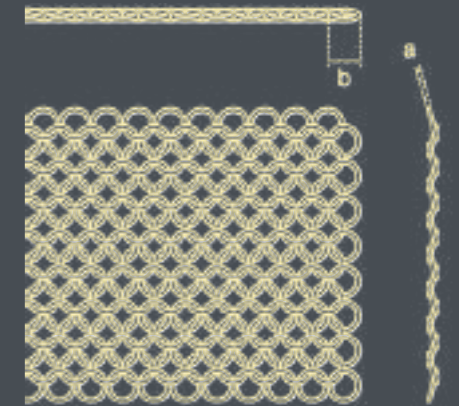

Ring outer diameter (b): 3.8 mm, 8 mm, 10 mm, 12 mm, 20 mm, 30 mm, 50 mm

Color: stainless steel, copper, black, gold, original, color can be customized.

Curtain size: customized according to the project

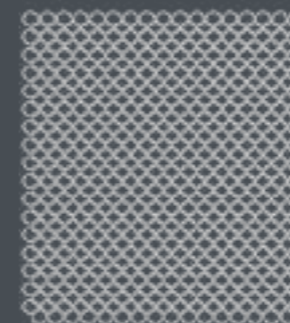

Surface treatment: electroplated

Process: Welded rings and non-welded rings, when the curtain length is greater than 3 m, welded rings are used.

ARGGER **S Hook Ring Mesh Curtain**

S hook ring mesh curtain consists of many metal circle rings and S hook fittings and is a new type metal decorative wire mesh. S hook ring mesh curtain is similar to chainmail curtain, but metal rings are connected in different ways, thus presenting different visual effect. S hook ring mesh curtain has a larger mesh spacing than that of chainmail curtain, therefore, it has higher transparency and better visibility. S hook ring mesh curtain is light and flexible. It is widely used in various building spaces and serves as space divider, curtain, wall and ceiling decorative material.

Installation

Flexible installation method and detailed installation guidance make your installation more convenient and efficient.

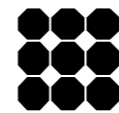

Application

ARGGER **Metallic Fabric Cloth**

Metallic fabric cloth has a network structure consisting of 4-leg metal sequins and metal rings. It feels like cloth and has good roughness and is light and flexible. Countless sequins make the curtain reflect scale-like light-shadow effect. It is commonly used in both interior and exterior building decorations, art designs, stage backgrounds, exhibition hall designs, etc. Compared with metal coil drapery and chain link curtain, metallic fabric cloth has little gap and can play the role of blocking or decorating walls.

Specifications

Detailed specifications enable you have more confident in your project.

Material: aluminum

Size (a): 4 mm, 6 mm, 8 mm, 10 mm

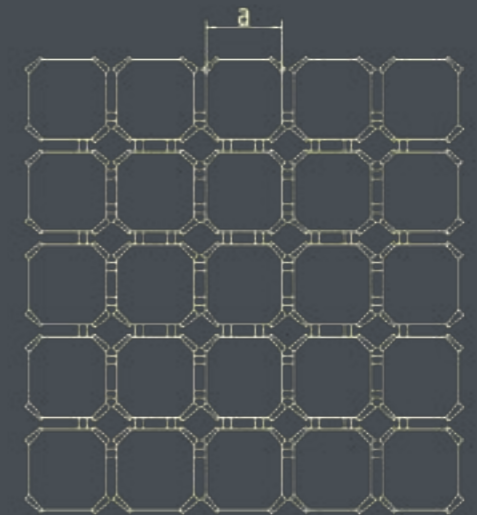

Shape: octagonal, round, quincuncial, spherical

Color: gold, purple, red, blue, green, silver, brown, black, original color; color can be customized.

Surface treatment: anodized and painted

Finish: gloss, colorful, dull polished, painted

Curtain length & width: customized upon request.

ARGGER Metal Bead Curtain

Metal bead curtain is made of high quality metal beads that can capture and reflect light to create an energetic, fantastic space atmosphere. No matter being used for art designs, building decoration, or acting as a simple, elegant curtain, metal bead curtain can easily blend into all kinds of environments. Meanwhile, metal bead curtain is a good solution that creates a perfect space divider without introducing a fixed partition. It not only adds the sense of beauty to the space, but also ensures people can pass through the curtain freely.

Specifications

No matter the detail modification of the building space or the visual impact of the huge space, metal bead curtain comes in a variety of specifications can perfect match with your space.

Material: low carbon steel and stainless steel

Bead shape: round, faceted

Diameter: 3 mm, 4 mm, 5 mm, 6 mm, 8 mm, 10 mm, 12 mm

Length: customized upon request

Finish: gloss or matte

Surface treatment: electroplated, anodized

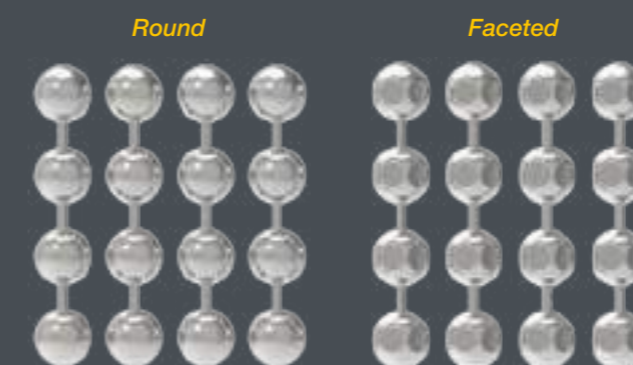

Category

Browse metal bead curtain and obtain unique, modern metal bead curtain category guidance.

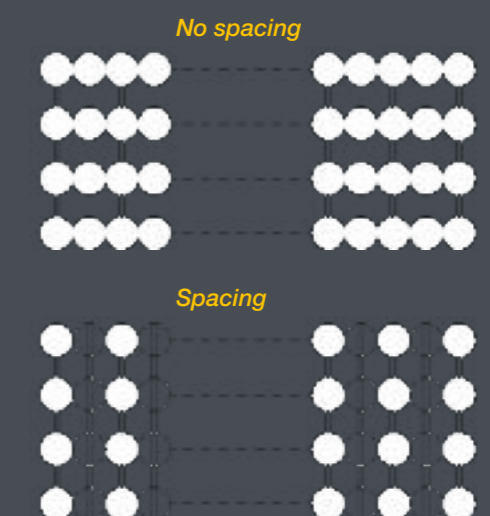

Round & Faceted

Round and faceted beads have their own features. Round metal bead has a smooth surface and looks more gentle and is suitable for any building environments. Faceted metal bead has better refraction and scattering effects and is more suitable for stages and spaces with higher light effect requirements.

No Spacing & Spacing

Our metal bead curtain can be divided into no spacing and spacing types. We will adjust the space between metal metals based on the overall visual effect.

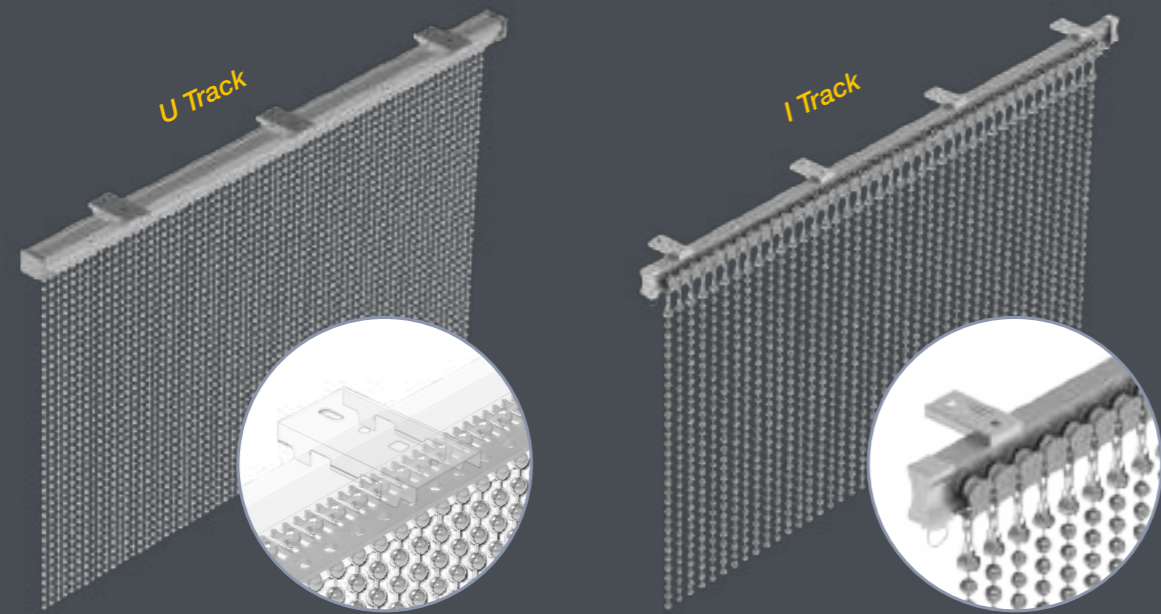

Finishes

Regardless of classical color or popular color, our metal bead curtain can be customized according to your unique style.

Installation

Flexible installation method and detailed installation guidance make your installation more convenient and efficient.

ARGGER Architectural Flat Flex Belt

Architectural flat flex belt is a kind of metal mesh material formed by interlocking two adjacent metal wires together. In addition to being used as conveyor belt in factories, it can also act as decorative mesh for interior spaces. Due to its unique shape, it can provide unique visual effect for building facade, interior design and art devices. Meanwhile, it is made of rigid materials and is suitable for being installed in public areas with a large flow of people and plays a role of anti-theft. If you are looking for a unique and functional decorative wire mesh, architectural flat flex belt is a good choice.

Specifications

ARGGER Woven Wire Drapery

Woven wire drapery is a kind of metal woven mesh formed by crossbars passing through metal cables. Unlike other metal decorative mesh, woven wire drapery can only exhibit great flexibility in the vertical direction due to its unique weaving structure. When being used as building facade, it also plays the role of sun blocking and fall prevention & protection. Besides, it also shows its unique charm in interior decorations such as wall decoration, ceiling style design and space partition. We can offer a variety of weave types and finishes to make your personalized architectural design come into reality.

Laminated Glass Art Mesh

Laminated glass art mesh is a kind of soft, exquisite woven fabric made by weaving fine metal wires together. This feature makes it can be covered on substrates easily, so it is often used as glass laminates, fabric wall coverings and curtains. It comes in a variety of wire diameters and weave densities to create fantastic textures that can present various light-shadow effects and transparencies. Under the light, it creates amazing light-shadow effects and bring high grade visual experience for your space.
